### Flat Tinsel Flash

Flat Tinsel – Crystal Flashabou

Slightly thicker than our standard laser crystal Flashabou tinsel, this material delivers outstanding fish-attracting performance. Adding just one or two strands to your flies can significantly increase your catch success rate.

Size: Approx. 0.4mm (1/69") x 35cm (when opened)

Quantity: Approx. 200 strands per bundle

#### Available Colors:

Dark Red—CLFT01, Rose Pink—CLFT02

Yellow—CLFT03, Chartreuse—CLFT04

Green—CLFT05, Blue—CLFT06

Purple—CLFT07, Black—CLFT08

Flash Black—CLFT09, Pearl White—CLFT10

Watermelon Red—CLFT11, Sky Blue—CLFT12

Pearl Purple—CLFT13

### Krystal Flash

Krystal Flash, is a popular fly-tying material consisting of fine, permanently twisted, and crinkled Mylar strands that create intense, multi-dimensional light refraction. It is ideal for adding lifelike shimmer to wings, tails, and bodies on streamers, nymphs, and saltwater patterns.

The strands are stiff enough to prevent fouling, making them excellent for winging or for creating dubbed bodies.

Commonly sold in hanks of approximately 150-200 strands.

Size about 28cm ~ 30cm length (fold in bag)

#### Available Colors:

Olive Green--FS01 | Pearl Orange--FS02

Pearl Pink--FS03 | Bright Red--FS04

Pearl White--FS05 | UV White--FS06

Olive Green--FS07 | Iridescent Rainbow--FS08

Rose Red--FS09 | Grass Green--FS10

Yellow--FS11 | Black--FS12

Blue--FS13 | Gold--FS14

Silver--FS15 | Yellow Green--FS16

Pink Purple--FS17 | Pearl Purple--FS18

Lemon Green--FS19 | Pearl Green--FS20

Iridescent--FS21 | Blue Brown--FS22

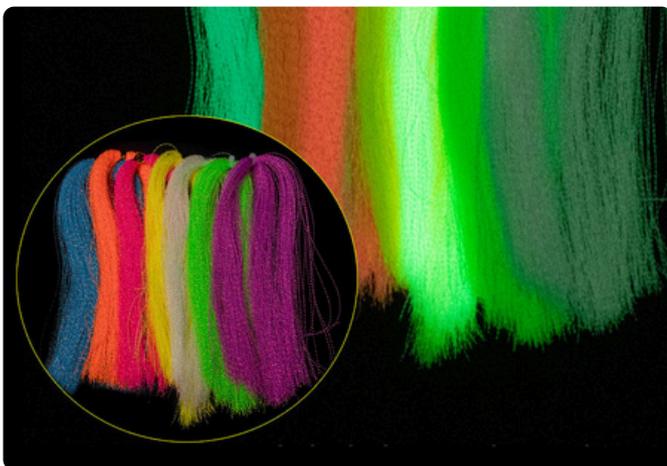

Silver Black--FS23 | Light Gold--FS24

Dark Pink--FS25 | Purple--FS26

Orange Red--FS27 | Orange Yellow--FS28

Fine Pearl White--FS29 | Red Black--FS30

*\*Bulk hank for commercial fly tying & factories available, please inquiry for details.*

### Luminous Krystal Flash

All colors glow in the dark

Length: Approx. 32 cm / 12.60 inches

Net Weight: Approx. 2.5 g per pack

#### Available Colors:

White--LTF01 | Orange--LTF02 | Purple--LTF03 |

Yellow--LTF04 | Blue--LTF05

Green--LTF06 | Rose--LTF07

## Synthetics

### Holographic Flat Tinsel Flash

Holographic Tinsel is a premium, soft, and durable tinsel material featuring a 3D holographic coating that reflects a wide spectrum of light to attract fish. It is ideal for fly tying, jigs, and lures.

#### Key Features and Characteristics

**3D Light Effect:** The material is designed to create a "3D color effect," mimicking the scales of baitfish and creating an intense, multi-color shimmer underwater.

**Action and Texture:** It has a soft, flowing movement in the water, similar to natural materials, and will not matte down.

**Dimensions:** Standard strands are 0.35mm wide and 30cm long, about 150 strands/pack. Though wider 1.5mm saltwater versions exist.

**Versatility:** Ideal for streamers, nymphs, salmon, steelhead, and muskie flies.

**Color Range:** Available in numerous fish-attracting colors that shimmer when exposed to light.

#### Usage in Fly Tying

**Wings and Tails:** Commonly used to add flash to streamers.

**Bodies:** Can be wrapped to create flashy, ribbed, or segmented bodies.

**Underwings:** Often used underneath other materials to add subtle, shimmering light.

**Flash:** Used to add extra attraction to lures and jigs.

#### Available Colors:

Green--HTF01 | Diamond Blue--HTF02  
 Lake Blue--HTF03 | Pink--HTF04  
 Light Purple--HTF05 | Purple--HTF06  
 Gold--HTF07 | Brozen--HTF08  
 Brown--HTF09 | Mix--HTF10  
 Silver--HTF11 | Red--HTF12  
 Flash Black--HTF13 | Black--HTF14

\*Bulk hank for commercial fly tying & factories available, please inquiry for details.

### Wide Krystal Tinsel Flash

Size: 2 mm (approx. 1/13 inch)X30cm length

Quantity: Approx. 80 strands per bag

Flat Mylar Tinsel is excellent for tying bodies or for ribbing on nymphs, streamer patterns and wet flies.

#### Available Colors:

UV Orange--WTF01 | Red--WTF02  
 UV Yellow--WTF03 | Blue--WTF04  
 Purple--WTF05 | UV Green--WTF06  
 Pearl White--WTF07 | Sky Blue--WTF08  
 UV Pink--WTF09

### Corrugated Tinsel Flash

Corrugated Tinsel Flash attracts fish like no other flash material. The corrugated texture simulates the scales of a fish as it reflects light. Adding just a few strands of this durable flash to a wing or tail can create an irresistible pattern. It works great on both Salmon and Sea Trout patterns.

#### Specifications:

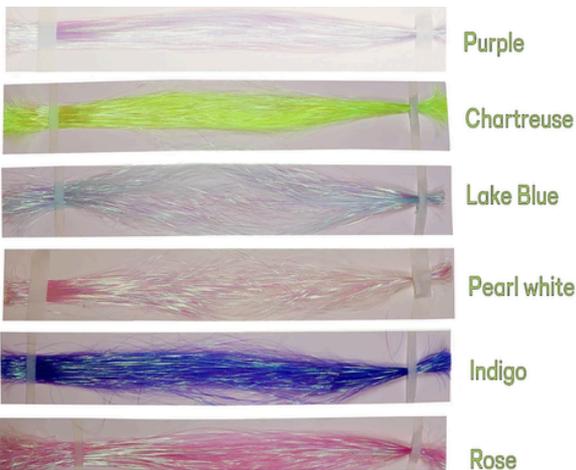

Size: 1 mm / 0.04 inch x 28 cm / 11 inches

Quantity: Approx. 125 strands per pack

#### Available Colors:

UV Green--CFT01 | UV Rose--CFT02  
 UV Pink--CFT03 | UV Chartreuse--CFT04  
 Pearl White--CFT05 | Blue--CFT06

## Synthetics

### Micro Gliss Glow Flash

Gliss Glow is an iridescent flash material that attracts fish like no other. The strands feature a corrugated texture that simulates the scales of a fish when reflecting light. Adding just a few strands of this durable flash to a wing or tail can create an irresistible pattern. It works great on both Salmon and Sea Trout patterns—such as the popular Banana Fly. You can also tie impressive streamers with it for Pike or any other predator in fresh or saltwater. With its multicolor options, you'll always find the perfect match for your pattern!

Size: 1/100 inch (0.2 mm) x 10 inches (25 cm)

Approx. 300 strands per pack

Application:

Ideal for tying onto wings or tails, perfect for both saltwater and freshwater streamer flies.

#### Available Colors:

Pearl White--GGF01 | Chartreuse--GGF02

Lake Blue--GGF03 | Rose--GGF04

Indigo--GGF05 | Purple--GGF06

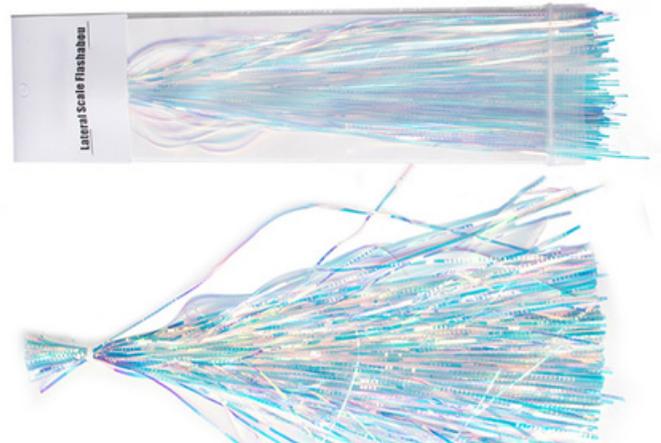

### Lateral Scale Tinsel Flash

Made of durable Flashabou material  
Corrugated strands that reflect light  
Effectively mimics the natural scale pattern of a fish

Made of durable Flashabou material  
Corrugated strands that reflect light  
Perfect for tying streamers, steelhead flies, saltwater patterns, and more.

#### Available Colors:

Golden--LSTF01 | Silvery--LSTF02

### Corrugated Tinsel Flash

Lateral Scale is a durable saltwater Flashabou material featuring a crimped texture that creates a realistic scaled appearance. This unique texture produces an irresistible fluttering action in the water, making it highly effective for attracting fish.

Perfect for large freshwater and saltwater minnow and baitfish patterns, as well as jigs and poppers designed for warm water species.

Length~25cm/9.84"

Width: 1mm (1/25"), 1.5mm (1/16")

Strands:~125 strands/pack

#### Available Sizes:

Pearl 1mm--PLF01 | Pearl 1.5mm--PLF02

## Synthetics

### Corrugated Iridescent Flash Tinsel

This is an iridescent flash material that attracts fish like no other. The strands are corrugated, so when they reflect light, they effectively simulate the scales of a fish. Adding just a few strands of this durable flash to a wing or tail can create an irresistible pattern.

It works great on both Salmon and Sea Trout patterns. You can also tie impressive streamers with it—for Pike or any other predator in fresh or saltwater. With a wide range of colors available, you'll always find the perfect tone for your pattern.

Width: Approx. 1 mm (1/25 inch)

Length: Approx. 28–30 cm / 11–11.8 inches

#### Available Colors:

Pearl White--CIFS01 | Purple--CIFS02

Red--CIFS03 | Blue--CIFS04

UV Yellow--CIFS05 | UV Green--CIFS06

UV Rose--CIFS07 | UV Peach--CIFS08

### Mixed Luminous Tinsel Flash

Material: Synthetic Mylar fiber

Opened Length: Approx. 50 cm / 19.69 inches

Folded Length (in bag): Approx. 25 cm / 9.84 inches

Soft and fine Mylar strands — three types of tinsel blended together

Brilliant light-reflecting properties

Lifelike movement in the water

Luminous in dark and murky water conditions

#### Available Colors:

Lt Red--MLFT01 | Rose--MLFT02

Orange--MLFT03 | Blue--MLFT04

Chartreuse--MLFT05 | Golden--MLFT06

### Micro Hair Tinsel Flash

Ultra-fine, straight, smooth, and durable long synthetic fibers. These fibers do not absorb water, keeping the fly light and easy to cast. They reflect light beautifully, offering a semi-translucent and shiny appearance.

Length: 30 cm X about 800 strands per pack  
Ideal for tying fishing flies, saltwater streamers, salmon patterns, baitfish patterns, and more.

#### Available Colors:

Green--MHFF01 | Chartreuse--MHFF02

Olive--MHFF03 | Sky Blue--MHFF04

Dull Red--MHFF05 | Gold--MHFF06

Lt Brown--MHFF07 | Off White--MHFF08

## Synthetics

### Flat Mylar Tinsel Bobbins

3D Holographic flat Mylar tinsel & solid color metallic tinsel in bobbin, ideal for adding brilliant flash and realistic reflection to your fly patterns. The holographic finish creates stunning light play that attracts fish in various water conditions.

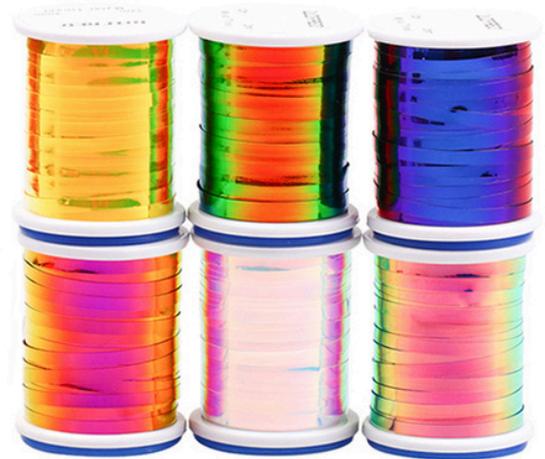

Perfect for tying nymphs, buzzers, midges, streamers, saltwater flies, and more.

**Width: Approx. 1.0 mm**

Length: Approx. 110 m / 120 yards per spool

#### Available Colors:

Holo Lt Blue--HFMT01 | Holo Blue--HFMT02  
 Holo Rose--HFMT03 | Holo Silver--HFMT04  
 Holo Purple--HFMT05 | Holo Gold--HFMT06  
 Rainbow--HFMT07 | Red--HFMT08  
 Blue--HFMT09 | Silver--HFMT10  
 Pearl White--HFMT11 | Green--HFMT12  
 Gold--HFMT13 | Rose--HFMT14

### 2mm Flat Mylar Tinsel

This newly developed flat Mylar tinsel is made from high-quality Mylar material. It lies flat and features two tones—the obverse side is one color, and the reverse side is another, allowing either side to be used for tying flies. The tinsel is wound on plastic spools that fit standard bobbin holders available on the market. This flat 2-tone Peacock Mylar tinsel is highly shiny and durable, ideal for adding ribbing and forming bodies on flies.

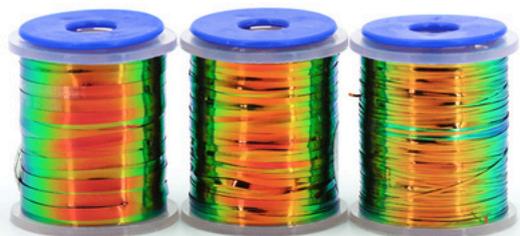

Material: Mylar, Width: 2 mm

Length: Approx. 12 m / 13.12 yards per spool

A perfect material for tying traditional streamer patterns, midges, flashback nymphs, and saltwater flies.

#### Available Colors:

Green--TTF01 | Pearl White--TTF02  
 Purple--TTF03 | Yellow--TTF04  
 Green/Purple--TTF05 | Copper--TTF06

### 2 Tone Flat Mylar Tinsel

Get two colors for the price of one with this innovative double-sided tinsel, featuring a different color on each side. one side peacock Green and the other side orange.

Sizes:

Width: 0.5 mm | Length: Approx. 50 m (55 yds)

Width: 1 mm | Length: Approx. 25 m (27 yds)

Width: 2 mm | Length: Approx. 12 m (13 yds)

#### Available Colors:

Peacock0.5mm--PTTF01  
 Peacock1.0mm--PTTF02  
 Peacock2.0mm--PTTF03

### 1mm Flat Mylar Tinsel

This newly developed flat Mylar tinsel is made from high-quality Mylar material. It lies flat and features two tones—the obverse side is one color, and the reverse side is another, allowing either side to be used for tying flies. The tinsel is wound on plastic spools that fit standard bobbin holders available on the market. It is highly shiny and durable, ideal for adding ribbing and forming bodies on flies.

Material: Mylar, Width: 1 mm

Length: Approx. 20 m / 13.12 yards per spool

A perfect material for tying traditional streamer patterns, midges, flashback nymphs, and saltwater flies.

#### Available Colors: 11

### Slinky Fiber

The long Slinky Fiber is a fly tying material and was made of synthetic fiber, sparkling under sunlight. With the right-sized crinkle for a bulky but lightweight body and looks natural in the water. The perfect substitute for super hair, nice crimp to make flies body without building up. Multiple colors that blend very easy, used for tying any freshwater and saltwater streamers files etc...

#### Available Colors:

- Blue--SF01 | Green--SF02
- White--SF03 | Fluorescent Green--SF04
- Pink--SF05 | Olive--SF06
- Black--SF07 | Red--SF08
- Yellow--SF09 | Orange--SF10
- Yellow Green--SF11 | Rose Red--SF12
- Brown--SF13 | Gray--SF14
- Lake Blue--SF15

### EP Fiber

These fibers are light, amazingly translucent and have an action between marabou and bucktail. 10 inches in length, they are perfect fibers to imitate any baitfish pattern for fresh or saltwater including very small patterns. Large flies tied with these fibers are a dream to cast because on the first back cast they will shake the water away.

#### Available Colors:

- Red--EP01 | Deep Pink--EP02 | Rainbow--EP03
- Light Pink--EP04 | Mix--EP05 | Black--EP06
- Dk Purple--EP07 | Wine Red--EP08 | Brown--EP09
- White--EP10 | Yellow--EP11 | Lake Blue--EP12
- Green--EP13 | Purple--EP14 | Olive Green--EP15
- Olive Green--PC15

## Synthetics

### Micro Shaggy Fly Dub

Micro Shaggy Fly Dub is a spandex micro hair material with properties similar to rubber, but with critical advantages: it is UV resistant and will not break down, crack, deteriorate, rot, or become unusable like rubber after exposure to elements and sunlight. The fibers are cut long, making them versatile for everything from small nymphs to extremely large streamers. The movement of this material brings flies to life—the faintest motion or water current creates an "alive" pulse that fish find irresistible. Blends exceptionally well with Laser Dub and Ice Dubbing to create wild bodies and heads on streamers and leeches. Available in 12 vibrant colors including UV fluorescent options.

#### Specifications:

Material: Silicone (spandex micro hair)

Net Weight: Approx. 1.9–2 g per pack

Features: UV resistant; will not crack, rot, or deteriorate like rubber; naturally curved; ultra-fine; soft; stretchable; bright colors

UV Colors: FL Green, FL Orange, Hot Pink, FL Yellow are fluorescent under UV light

#### Available Colors & SKUs:

FL Green -- MSD-01-FG  
 FL Orange -- MSD-02-FO  
 Hot Pink -- MSD-03-HP  
 FL Yellow -- MSD-04-FY  
 White -- MSD-05-WH  
 Red -- MSD-06-RD  
 Olive Green -- MSD-07-OG  
 Brown -- MSD-08-BR  
 Olive -- MSD-09-OL  
 Black -- MSD-10-BK  
 Purple -- MSD-11-PU  
 Orange -- MSD-12-OR

### 1mm Ultra Fine Chenille

1mm Ultra Fine Chenille is specifically designed for small fly patterns requiring a slim, segmented profile without added bulk. Perfect for Micro Juans, midge larvae, and small leeches, this ultra-fine chenille creates realistic bodies on hook sizes #12 through #16. A unique technique allows you to singe the ends with a lighter to create tapered, lifelike detached bodies that mimic natural larvae. Also excellent for worm patterns, nymph bodies, and as micro flex crab legs for saltwater patterns. Available in 13 colors including brown, taro purple, mist blue, green, blue, yellow, grey, black, red, pink, orange, egg yellow, and white.

#### Specifications:

Diameter: 1 mm

Length: 4 m per pack

Material: Ultra fine chenille

Features: Slim profile for small flies; can be singed with lighter for tapered, lifelike effect; creates realistic segmentation without bulk

#### Available Colors & SKUs:

Brown -- UFC-01-BR  
 Taro Purple -- UFC-02-TP  
 Mist Blue -- UFC-03-MB  
 Green -- UFC-04-GN  
 Blue -- UFC-05-BL  
 Yellow -- UFC-06-YE  
 Grey -- UFC-07-GY  
 Black -- UFC-08-BK  
 Red -- UFC-09-RD  
 Pink -- UFC-10-PK  
 Orange -- UFC-11-OR  
 Egg Yellow -- UFC-12-EY  
 White -- UFC-13-WH

## Synthetics

### Crimped Kinky Minnow Fiber

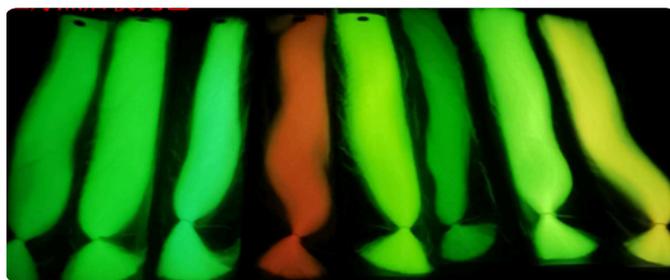

Crimped synthetic fibers designed for creating lifelike minnow patterns. The crimped texture adds bulk and movement, while the brilliant colors attract fish in various water conditions.

Perfect for tying streamers, baitfish imitations, jigs, and saltwater fly patterns.

Length: Approx. 30 cm

#### Available Colors:

Chartreuse--CKF01 | Pink--CKF02  
 Hot Pink--CKF03 | Black--CKF04  
 White--CKF05 | Dark Gray--CKF06  
 Light Gray--CKF07 | Blue--CKF08  
 Orange--CKF09 | Green--CKF10  
 Red--CKF11 | Yellow--CKF12  
 Purple--CKF13 | Olive--CKF14

### Luminous Crimped Kinky Minnow Fiber

Luminous Crimped synthetic fibers  
 Perfect for tying deep water or night fishing streamers, baitfish imitations, jigs, and saltwater fly patterns.

#### Available Colors:

Green--LCF01 | White--LCF02  
 Pink--LCF03 | Hot Pink--LCF04  
 Yellow--LCF05 | Peacock Blue--LCF06  
 Lake Blue--LCF07 | Light Blue--LCF08

### Synthetic Hair Fiber

Ultra-fine, smooth, bright, and straight fibers  
 Soft texture and waterproof  
 Strong and durable construction  
 Perfect for tying streamers, sabiki rigs, and more.

Size: 15cm length

#### Available Colors:

White--FAB01 | Yellow--FAB02  
 Pink--FAB03 | Green--FAB04  
 Fluorescent Green--FAB05 | Lake Blue--FAB06

### 12mm Ice Straggle Chenille

Ice Straggle Chenille provides exceptional movement in the water, similar to marabou, giving your flies incredible action. It is perfect for use on tube flies or streamer bodies and has become a popular material for modern salmon flies as well. You can easily trim Ice Straggle Chenille to your desired length using standard scissors. Ideal for hackles or bodies of flies such as Minkies, Boobies, Buggers, mini lures, leech patterns, streamers, and wet flies. Use it on bodies, as collars, or as hackles. This highly versatile material works wonderfully for salmon, steelhead, sea trout patterns—including shrimp flies, crabs, and borste worms—as well as saltwater and general trout flies.

Width: 12 mm (wrapped width) Length: 5m/card

#### Available Colors:

## Synthetics

### 2.5mm mottled Rayon Chenille

mottled rayon chenille with unique color blends that create natural-looking patterns and textures in your flies. Perfect material for tying Stonefly, Woolly Buzzer, worms, leech, streamer, and more.

Length: Approx. 5 m per card

#### Available Colors:

Watermelon--MRC01 | Grey Joy--MRC02  
Blue Fancy--MRC03 | Green & Grey--MRC04  
Ice Blue & Orange--MRC05

### 7mm Mop Chenille

The new development of Mop Chenille is a thick and fluffy fly tying material (equivalent to an XL size chenille). This chenille is super strong and expands when wet. Mop flies imitate grubs and other larvae colors that trout simply can't resist. Simply cut to length, secure one end on the hook (add a collar or not), and burn the tag end with a lighter or torch to prevent fraying.

Length: Approx. 3 m per pack

#### Available Colors:

UV Yellow--LMC01 | UV Orange--LMC02  
UV Pink--LMC03 | UV Rose--LMC04  
Red--LMC05 | Brown--LMC06  
Grey--LMC07 | Olive--LMC08

### Large Mottled Mop Chenille

Large size mop chenille, diameter 7~8mm. Perfect for Tying Mop Flies, Wet flies, Bass Worms, Woolly Worms, Leeches, Saltwater Flies and all Crappie Jigs etc.

Package: 3m(3.28yards)/Pack

Available Colors: 18

### 8mm Flash Mop Chenille

Pearlescent Flashabou synthetic fiber with high reflectivity

Will not fray and can be tapered with a flame  
Excellent movement in the water.

Perfect for tying Mop Flies, Woolly Worms, Leeches, Egg Flies, Bass Flies, Saltwater Flies, and more.

Length: 2 m per pack

#### Available Colors:

Red--FMC01 | White--FMC02  
Chartreuse--FMC03 | Yellow--FMC04  
Blue--FMC05 | Green--FMC06  
Rose--FMC07

## Synthetics

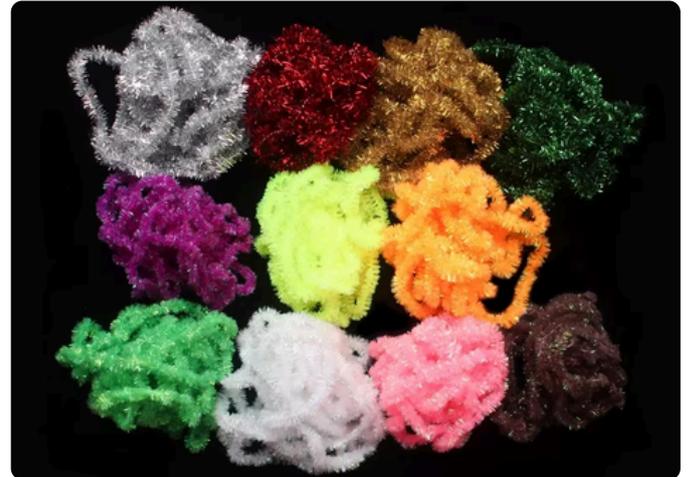

### Micro Bug Chenille

Soft and lightweight fiber construction  
Naturally curved yarn on braided thread  
Multiple colors available for various pattern needs  
Perfect for tying the body of nymphs, wet flies and more.

Length: 20 m (21.87 yards) per spool

#### Available Colors:

Olive Green--SBC01 | Dark Brown--SBC02  
Camel--SBC03 | Cream White--SBC04  
Pink--SBC05 | Fruit Green--SBC06  
Orange--SBC07 | Grey--SBC08  
Red--SBC09 | Brown--SBC10  
Off White--SBC11 | Black--SBC12  
Light Brown--SBC13 | White--SBC14

### 4mm & 6mm Ice Chenille

4 mm: Perfect for tying Woolly Buggers in hook sizes 6-10

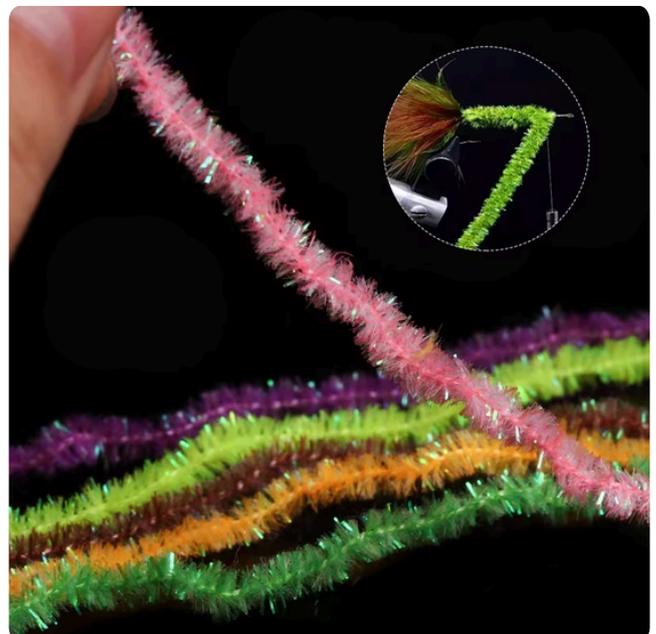

6 mm: Ideal for larger flies in hook sizes 6-2/0  
Package: 2m/Pack

#### 4 mm Width (2 m/pack):

Pearl Orange--CIC01 | Pearl Pink--CIC02  
Pearl Yellow Green--CIC03 | Pearl Green--CIC04  
Pearl Purple--CIC05 | Pearl Brown--CIC06

#### 6 mm Width (2 m/pack):

Pearl Pink--CIC07 | Pearl Yellow Green--CIC08  
Pearl Green--CIC09 | Pearl Purple--CIC10  
Pearl Brown--CIC11 | Red--CIC12  
Gold--CIC13 | Green--CIC14  
Silver--CIC15 | Pearl White--CIC16  
Pearl Orange--CIC17

## Synthetics

### Bug Gill Chenille

Ultra-fine yarn construction  
Slightly stretched and durable line  
short and fluff fibers mimic nymph gills. Perfect for tying flex rib bug worm patterns, any fluffy abdomen flies, or for creating multiple color twisted body leeches, nymphs, and more.

Length: 20 m per spool

#### Available Colors:

Olive--BGC01 | Blue--BGC02  
Peacock Blue--BGC03 | Red--BGC04  
Black--BGC05 | Grey--BGC06  
Brown--BGC07 | Yellow--BGC08  
Wine Red--BGC09 | White--BGC10  
Off White--BGC11 | Khaki--BGC12  
Light Brown--BGC13 | Dark Brown--BGC14

### ORGA Ice Chenille

ORGA Ice Chenille features translucent, shimmering fibers that are neither too soft nor too rigid, with a slightly kinked texture. It is perfect for use as a palmered hackle on bodies, as gills, as thorax legs, or to add extra sparkle to streamer flies.

Length: 3.2 m per spool , Width: 3 mm  
Translucent and shimmering appearance  
Slightly kinked fibers for enhanced texture  
Versatile application for various fly patterns  
Ideal for nymph, wet fly, and streamer fly tying.

#### Available Colors:

Green--OIC01 | Light Yellow--OIC02  
White--OIC03 | Orange--OIC04  
Sky Blue--OIC05 | Red--OIC06  
Khaki--OIC07 | Fluorescent Green--OIC08  
Purple--OIC09 | Blue--OIC10  
Dark Orange--OIC11 | Pink--OIC12  
Fruit Green--OIC13 | Black--OIC14 (Highly Purchased)  
Brown--OIC15 | Wine Red--OIC16  
Dark Grey--OIC17

## Synthetics

### Egg Yarn

Egg Yarn is a soft, fluffy yarn commonly used on Glo Bugs, minnow streamers, and other egg patterns. Because it is hydrophobic, it also works well when wrapped as a body on large dry flies.

Very easy to use.

Perfect for tying Glo Bugs, egg patterns, and minnow streamers.

Packing: 2m per card

#### Available Colors:

Hot Pink--EGY01 | Chartreuse--EGY02

Orange--EGY03 | Green--EGY04

Red--EGY05

### Egg Foam Yarn

Easy-to-use material for tying round, durable, and vibrant egg patterns (Glo Bugs) for trout and salmon. It is a stretchy, spongy, and colorfast synthetic material that snaps into shape when trimmed, often creating perfect eggs in seconds.

Also good for making head shapes on flies like egg sucking leeches, or chicken little flies

Packing: 2m per bag

#### Available Colors:

Hot Pink--EFY01 | Chartreuse--EFY02

Orange--EFY03 | Green--EFY04

Red--EFY05

### EZ Egg Yarn

EZ Egg Yarn is the ultimate egg yarn chenille, measuring approximately 8–10 mm in diameter. It makes tying egg flies fast and easy—just a few turns with or without a bead and you're done. The material holds water and provides a natural, transparent look, just like a real egg. Suitable for both river and stillwater fishing.

Perfect for tying egg patterns for both river and stillwater fishing.

Width: Approx. 8 mm – 10 mm

Length: 2 m per pack

#### Available Colors:

Red--EEY01 | Orange--EEY02

## Synthetics

### Flat Diamond Braid Flash

Flat braided Mylar material that adds a beautiful sheen to the body of your fly. Perfect for creating durable, flashy bodies with excellent light reflection.

Ideal for bonefish flies, streamer bodies, muddlers, and more.

Size: 3 mm, 2yard/pack

#### Available Colors:

Brown--DBF01 | Blue--DBF02  
 Black--DBF03 | White--DBF04  
 Pink--DBF05 | Purple--DBF06  
 Red--DBF07 | Green--DBF08  
 FL Yellow--DBF09 | Pearl White--DBF10

### Scud Stretch Back

This elastic shell back material is perfect for all nymph tying, giving a natural look to your fly. It provides a realistic translucent appearance that mimics natural scud and nymph shells.

Ideal for tying scud patterns, nymphs, and any pattern requiring a flexible, natural-looking shell back.

Packing: 2m per bag

#### Available Colors:

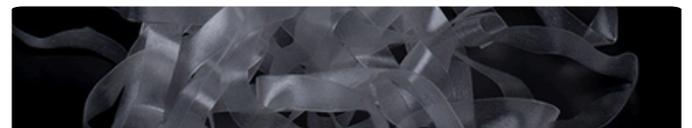

### Diamond Braid

Flat braided Mylar material that adds a stunning holographic sheen to the body of your fly. Perfect for creating durable, flashy bodies with exceptional light reflection. Ideal for bonefish flies, streamer bodies, muddlers, and any pattern requiring durable, high-visibility flash. Width: 1 mm, Length: 10 m per spool

#### Available Colors:

### Mangum's Dragon Tails

These tapered tails make it super fast and easy to tie big baits with incredible action. Use them "as is" for hook sizes 2/0–5/0, or cut them shorter for smaller hook and baitfish sizes (apply a dab of super glue at the cut to prevent fraying). Tails have been specially treated for enhanced color fastness and durability. Great for bass, pike, muskie, Murray cod, and—as originally intended—saltwater baitfish patterns.

Perfect for streamers. Can be shortened and used with adhesive for a variety of body, wing, and tail applications.

Available Sizes: 10 cm | 22 cm

### Faux Bucktail

Tie flies of all types and sizes—from nymphs to Clousers to T-Bones—with Faux Bucktail, a tapered synthetic multi-use fly tying fiber designed to imitate typical premium-length natural bucktail. Faux Bucktail fibers have the same basic diameter, gentle crinkle, and taper as natural bucktail. In appearance, it looks almost identical and provides the same distinctive bucktail fly action in the water.

- Long, tapered, and durable fibers
- Gentle crinkle texture
- Natural imitation of genuine bucktail
- Excellent movement in the water
- Length: Approx. 14.5 cm / 5.71 inches
- Weight: Approx. 30–33 g per piece

#### Available Colors:

- White--FBT01 | Orange--FBT02
- Chartreuse--FBT03 | Black--FBT04

### Customize Streamer Brush

#### Streamer Fly Tying Brush

Precision-engineered for fly tyers who demand performance and consistency. Our custom brushes are built to your exact specifications, offering unmatched versatility for crafting everything from slender baitfish patterns to bulkier predator profiles.

#### Fully Customizable Specifications:

**Length:** 32cm

**Width:** Adjustable from 2cm to 20cm

**Materials:** Choose from EP Fiber, Ice Wing, Nayat, Rubber String, Kraft Fur, Fox Hair, Rabbit Hair, Tinsel Flash, or any material of your choice

**Patterns:** Solid colors, multi-color combinations, or classic grizzly

**Shape:** Tapered or level

**Wire Options:** Light (0.1mm), Medium (0.15mm), Heavy (0.2mm)

#### Quality Control:

Density is precisely controlled by material volume.

Each brush is crafted to ensure even fiber distribution, minimize tangling, and maintain optimal wire twist for secure fiber retention.

#### Packaging Options:

Available in clear bags (1-2 pieces per pack) or bulk packaging—ideal for production use.

Build your perfect streamer brush—tailored to your pattern, your process, your vision.

## Synthetics

### Organza Tinsel Flash

Organza and tinsel flashers are popular synthetic fly-tying materials designed to add shimmer, motion, and visibility to fishing lures, jigs, and flies. These materials are used to mimic the scales of baitfish and attract fish in various light conditions.

#### Available Colors:

- Orange--OTF01 | Yellow Green--OTF02
- White--OTF03 | Pink--OTF04
- Fluorescent Yellow--OTF05 | Yellow--OTF06
- Blue--OTF07 | Lake Blue--OTF08

- 5--IFW05 | 6--IFW06 | 7--IFW07 | 8--IFW08
- 9--IFW09 | 10--IFW10 | 11--IFW11 | 12--IFW12

## Synthetics

### Swiss Staw

Swiss Straw (also known as synthetic raffia) is a versatile, ribbon-like material used primarily for creating realistic wings, wing cases, and shellbacks on nymphs and dry flies. Its soft, papery texture becomes pliant and translucent when wet, effectively mimicking the natural appearance of insect husks and wings. Available in 10 colors including orange, off white, gold, wine red, rose red, olive, black, royal blue, light brown, and brown. Each card contains 2 m of material.

#### Application:

**Wing Cases:** Standard choice for stonefly, mayfly, and damselfly nymphs due to flat, durable profile

**Shellbacks:** Widely used for scuds, sowbugs, crayfish, and shrimp patterns to create segmented, protective-looking backs

**Wings:** Excellent for realistic caddis wings; easily shaped with wing cutters or scissors

**Segmented Bodies:** When wrapped around hook shank, creates lifelike, two-toned segmented bodies for both dry flies and nymphs

#### Available Colors & SKUs:

- Orange -- SS-01-OR
- Off White -- SS-02-OW
- Gold -- SS-03-GD
- Wine Red -- SS-04-WR
- Rose Red -- SS-05-RR
- Olive -- SS-06-OL
- Black -- SS-07-BK
- Royal Blue -- SS-08-RB
- Light Brown -- SS-09-LB
- Brown -- SS-10-BR

### Bio Ribbing

Bio Ribbing is a specialized fly tying material made from natural collagen (catgut) or advanced synthetic fibers designed to mimic the translucent, segmented bodies of aquatic larvae. Its unique property of transforming from opaque when dry to a "milky" translucency when wet provides lifelike depth that traditional plastics cannot match. Must be soaked in warm water for 3-5 minutes before tying to achieve optimal softness and flexibility. Available in five sizes from XXS (#18-#20) to L (#8-#10) to accommodate patterns from tiny midges to larger nymphs. Size XS is highly purchased for its versatility on #16-#18 hooks.

#### Application:

Segmented bodies on nymph and larvae patterns  
Realistic midge and mayfly imitations  
Translucent body segments requiring natural depth

Any pattern where lifelike translucency is desired  
Euro nymphing and competition patterns

#### Available Sizes & Recommended Hook Sizes:

**Size XXS:** 0.18 mm | Recommended hook sizes: #18-#20 | Size SKU: BR-XXS

**Size XS:** 0.18 mm | Recommended hook sizes: #16-#18 | Size SKU: BR-XS (Highly Purchased)

**Size S:** | Recommended hook sizes: #12-#14 | Size SKU: BR-S

**Size M:** | Recommended hook sizes: #10-#12 | Size SKU: BR-M

**Size L:** 0.7 mm | Recommended hook sizes: #8-#10 | Size SKU: BR-L

## Synthetics

### Realistic Insect Eyes

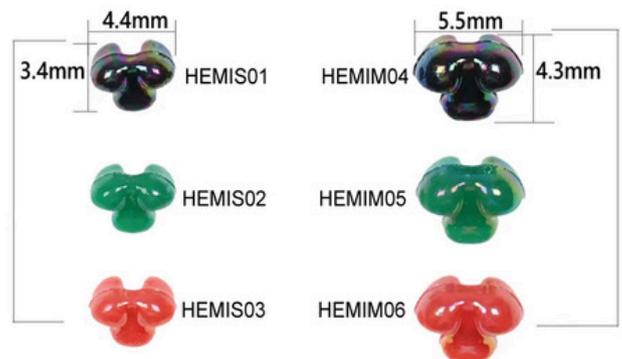

Designed to simulate the realistic eyes of insects like houseflies and dragonflies on fishing lures.

Material: Made from durable plastic with a holographic finish to attract fish.

Features: Includes double dragonfly eye beads and housefly eye beads in various colors.

#### Available Colors:

1--HEMIS01 | 2--HEMIS02 | 3--HEMIS04  
 4--HEMIS04 | 5--HEMIS05 | 6--HEMIS06  
 7--HEMIS07 | 8--HEMIS08 | 9--HEMIS09

## Synthetics

### Realistic Mayfly Wings

Mayfly Wings offer ultra-realistic, ready-to-tie wings that will set your dry flies apart by mimicking the natural look of real mayfly wings, enhancing the authenticity of your flies. With 140 translucent wings in five different sizes, you can create flies for hook sizes ranging from #8 to #18, ensuring you have the perfect wing for any fly.

Sizes in one sheet: S | M | L | XL | XXL

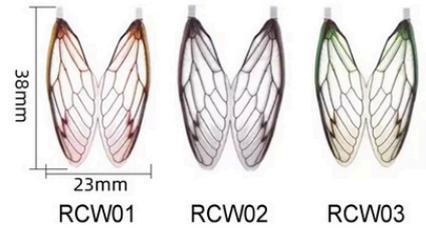

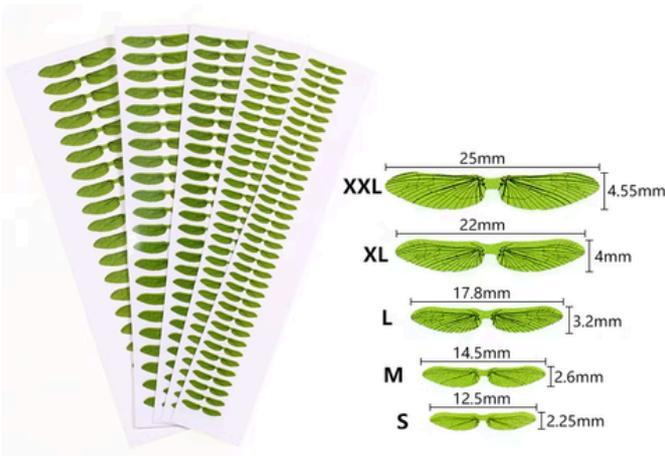

Quantity: 140 translucent wings per pack (across all sizes)

Suitable Hook Sizes: #8 to #18

#### Available Colors:

Olive--RMW01 | Grey--RMW02

Yellow--RMW03 | Brown--RMW04

### Realistic Cicada Wings

Crafted with precision, Cicada Wings offer ultra-realistic, ready-to-tie insect wings that will set your flies apart during this rare phenomenon. These wings mimic the natural appearance of cicada wings, making your patterns irresistible to fish during cicada hatches.

#### Available Colors:

Orange--RCW01 | Grey--RCW02

Green--RCW03

## Synthetics

### Realistic Peacock Quills

Synthetic Peacock Quill is a durable and consistent alternative to natural peacock quill. Perfect for creating segmented bodies on dry flies, wet flies, and nymphs with a realistic appearance.

**Available Colors:**

**Transparent Colors:**

- Green (Transparent)--SPQ01 | Pink (Transparent)--SPQ02
- Orange (Transparent)--SPQ03 | Brown (Transparent)--SPQ04
- Black (Transparent)--SPQ05 | Yellow (Transparent)--SPQ06
- Blue (Transparent)--SPQ07 | Olive (Transparent)--SPQ08

**Solid Colors:**

- Green (Solid)--SPQ09 | Pink (Solid)--SPQ10
- Orange (Solid)--SPQ11 | Brown (Solid)--SPQ12
- Black (Solid)--SPQ13 | Yellow (Solid)--SPQ14
- Blue (Solid)--SPQ15 | Olive (Solid)--SPQ16

Solid Color

Transparent Color

### Realistic Shrimp Skin

Elastic, semi-transparent shrimp skin with segmented lines for ultra-realistic appearance. Durable yet flexible material that mimics the natural look and movement of real shrimp. Easy to use—simply tear off the desired piece (no glue on the back) and secure with AB resin glue or UV glue.

Available Sizes: S | M | L | XL

**Quantity per Sheet:**

- Size S: 16 pieces
- Size M: 12 pieces
- Size L: 10 pieces
- Size XL: 8 pieces

**Available Colors:**

- Size S:
  - Orange--RSS-S01 | Green--RSS-S02
  - Pink--RSS-S03 | Olive--RSS-S04
- Size M:
  - Orange--RSS-M01 | Green--RSS-M02
  - Pink--RSS-M03 | Olive--RSS-M04
- Size L:
  - Orange--RSS-L01 | Green--RSS-L02
  - Pink--RSS-L03 | Olive--RSS-L04
- Size XL:
  - Orange--RSS-XL01 | Green--RSS-XL02
  - Pink--RSS-XL03 | Olive--RSS-XL04

## Synthetics

### Realistic Housefly Wings

Realistic Housefly Wings for housefly, bee fly tying.

For hook size: 12, 14, 16

**SKU: RHW-01**

### Realistic Cranefly Wings

Realistic Cranefly Wings for crane fly, wasp fly tying.

For hook size: 12, 14, 16

**SKU: RCW-01**

### Realistic Nymph Skins

Segmented, mottled translucent elastic film strips for building nymph body or scud, shrimp back.

Size: 2.5mm, 3mm, 4mm

One sheet include:

Size 2.5mm: 40 strands,

Size 3mm: 32 strands,

Size 4mm: 24 strands.

**SKU:**

Size 2.5mm--RNS01 | Size 3mm--RNS02

Size 4mm--RNS03

**2.5mm**

**3mm**

**4mm**

### Realistic Mottled Bio Skin

Realistic mottled bio skin for scud back, shrimp fly tying. Elastic and translucent material. Cut to any size as requirement

Sheet size: 12X12cm

**Colors Available:**

Blue--RMB01 | Pink--RMB02 | Green--RMB03

Black--RMB04 | P&B--RMB05 | R&B--RMB06

### Realistic Jungle Cock Eyes

Realistic jungle cock eyes for salmon flies. Sturdy material with double side printing.

4 sizes( XS, S, M, L) in one sheet

Sheet size: 10X20cm

**SKU: RJC-01**

## Synthetics

### Realistic Stonefly Wings

Elastic, semi-transparent wings with insect bio wing patterns for ultra-realistic appearance. Durable yet flexible material that mimics the natural look of stonefly.

Sheet size 6X12cm.

**Available Colors:**

Yellow--RSS01 | Brown--RSS02  
 Dark Brown--RSS03 | Clear--RSS04  
 Olive--RSS05 | Dark Olive--RSS06

### EP Minnow Tube

Pearl white EP minnow tube. for EP minnow streamer fly and other streamer fly tying.

Diameter: 2mm, 4mm, 6mm, 8mm, 10mm, 12mm

**SKU:**

Size 2mm--EPMT01 | Size 4mm--EPMT02  
 Size 6mm--EPMT03 | Size 8mm--EPMT04  
 Size 10mm--EPMT05 | Size 12mm--EPMT06

### Poly Tubes for Tube Fly

Clear poly tubing specifically designed for tying tube flies. Perfect for creating lightweight, durable tube fly bodies that allow for easy hook changes and versatile fishing applications.

Available External Diameters: 2 mm | 3 mm | 3.3 mm

Packing: 20 cm x 20 pieces per pack

**Available Options by Diameter:**

2 mm: CPTF01  
 3 mm: CPTF02  
 3.3 mm: CPTF03

## Head, Beads, Eyes, Cones

### Metal Fish Head with 3D Eyes Combo

Premium metal fish heads with matching 3D epoxy eyes, designed for creating professional-quality sinking streamers. The zinc alloy construction provides excellent weight for deep fishing, while the 3D eyes add lifelike attraction.

Perfect for tying big sinking streamers, saltwater patterns, and any pattern requiring weighted heads with realistic eyes.

Material: Zinc Alloy (Fish Head) | Epoxy (Fish Eyes)

Available Colors: Golden | Silvery | Black Nickel | FL. Rose | FL. Green | FL. Orange

Available Sizes: S | M

Weight: S ≈ 1.1 g / 0.035 oz | M ≈ 1.85 g / 0.065 oz

Packing: 10 fish heads with 10 pairs of 3D fish eyes per pack

Recommended Hook Sizes:

Size S: Suggested hook sizes: #1, 1/0, 2/0, 3/0

Size M: Suggested hook sizes: 3/0, 4/0, 5/0, 6/0

#### Available Options by Size and Color:

Size S:

Golden--MFH-S01 | Silvery--MFH-S02

Black Nickel--MFH-S03 | FL. Rose--MFH-S04

FL. Green--MFH-S05 | FL. Orange--MFH-S06

Size M:

Golden--MFH-M01 | Silvery--MFH-M02

Black Nickel--MFH-M03 | FL. Rose--MFH-M04

FL. Green--MFH-M05 | FL. Orange--MFH-M06

### EP Minnow Tube

Sculpin Fish Heads are precision-crafted zinc alloy heads designed specifically for tying fish skull sculpin helmet flies. The innovative keel-weighted design ensures your flies ride hook-up, reducing snags while maintaining a realistic swimming action. Each head comes with matching 3D eyes for a complete, professional finish.

Material: Zinc Alloy

Available Sizes: S | L

Available Colors: Olive | Brown | Black | Gold | Bronze | Silver

Weight:

Size S: ≈ 1.38 g / 0.05 oz per piece

Size L: ≈ 2.98 g / 0.10 oz per piece

Packing: 10 pieces with 3D fish eyes per pack

Recommended Hook Sizes:

Size S:

Suitable for hooks: #6, #4, #2, #1

Size L:

Suitable for hooks: #2, #1, #1/0, #2/0

#### Available Options by Size and Color:

Size S:

Olive--SFH-S01 | Brown--SFH-S02

Black--SFH-S03 | Gold--SFH-S04

Bronze--SFH-S05 | Silver--SFH-S06

Size L:

Olive--SFH-L01 | Brown--SFH-L02

Black--SFH-L03 | Gold--SFH-L04

Bronze--SFH-L05 | Silver--SFH-L06

## Head, Beads, Eyes, Cones

### Poly Fish Head with 3D Eyes

Poly Fish Heads are precision-crafted from lightweight ABS plastic, designed for creating professional-quality streamers with minimal weight. The clear finish provides a natural, translucent appearance while the realistic profile holds materials perfectly. The included 3D eyes add lifelike attraction, and the ultra-lightweight construction ensures easy casting without sacrificing realistic appearance.

Material: ABS Plastic

Color: Clear

Available Sizes: 4 | 6 | 8

Weight: Ultra-lightweight design

Packing: 20 pieces with 3D fish eyes (default silvery color) per pack

Recommended Hook Sizes:

Size 4: Suitable for hooks: #8, #6, #4

Size 6: Suitable for hooks: #2, #1, #1/0

Size 8: Suitable for hooks: #1/0, #2/0, #3/0

#### Available Options by Size:

Clear--PFH-4-01

Size 6:

Clear--PFH-6-01

Size 8:

Clear--PFH-8-01

### Poly Dumbbell Fish Eyes

Poly Dumbbell Fish Eyes offer a revolutionary alternative to traditional glued fish eyes. Made from lightweight poly material, they are simply tied directly into your fly pattern—no resin, no UV glue, and no risk of eyes detaching during use. The dumbbell shape provides excellent articulation while the vivid colors attract fish attention. Perfect for streamer fly tying where durability and realism are essential.

Ideal for streamer flies, baitfish imitations, predator patterns, and any fly requiring realistic, lightweight, permanently secured eyes.

Available Sizes: 6 mm | 8 mm | 10 mm

Eye Colors: Yellow | Silvery | Red

Packing: 10 pairs per pack

#### Available Options by Size and Color:

6 mm:

Yellow--PDF-6-01 | Silvery--PDF-6-02 | Red--PDF-6-03

8 mm:

Yellow--PDF-8-01 | Silvery--PDF-8-02 | Red--PDF-8-03

10 mm:

Yellow--PDF-10-01 | Silvery--PDF-10-02 | Red--PDF-10-03

## Head, Beads, Eyes, Cones

### Weighted Brass Dumbbell Beads

Weighted Sunken Brass Dumbbell Beads are precision-crafted for creating medium-sinking fly patterns. The sunken shape provides excellent keel action, helping flies ride hook-up position. Made from durable brass with a silver finish, these beads add the perfect amount of weight without compromising fly action.

Material: Brass

Color: Silver

Packing: 10 pieces per pack (eyes not included)  
Ideal for medium sinking rate flies such as Crazy Charlies, Clouser Minnows, shrimp flies, and various streamer patterns.

#### Size S:

Dimensions:  $\approx 5.8 \text{ mm} \times 3.4 \text{ mm}$

Weight:  $\approx 0.27 \text{ g}$  per piece

Suggested 3D Eyes Size: 2.5 mm – 3 mm

SKU: WSB-S

#### Size M:

Dimensions:  $\approx 6.3 \text{ mm} \times 3.9 \text{ mm}$

Weight:  $\approx 0.4 \text{ g}$  per piece

Suggested 3D Eyes Size: 3 mm – 3.5 mm

SKU: WSB-M

#### Size L:

Dimensions:  $\approx 7.4 \text{ mm} \times 4.9 \text{ mm}$

Weight:  $\approx 0.7 \text{ g}$  per piece

Suggested 3D Eyes Size: 4 mm – 4.5 mm

SKU: WSB-L

### Eyed Brass Dumbbell Beads

Eyed Brass Dumbbell Beads combine the functionality of weighted dumbbell beads with the convenience of pre-painted eyes. These all-in-one beads save tying time while providing realistic eye appeal and proper weighting for your flies. The brass construction ensures durability and the right amount of sink rate. Ideal for medium sinking rate flies such as Crazy Charlies, Clouser Minnows, shrimp flies, and various streamer patterns.

Material: Brass with painted eyes

Packing: 10 pieces per pack

Size S: 7 mm length  $\times$  3.2 mm eye width |  
Weight: 0.2 g | Recommended hook size: #12;

Size M: 8 mm length  $\times$  4.0 mm eye width |  
Weight: 0.35 g | Recommended hook sizes: #8,  
#10;

Size L: 10 mm length  $\times$  4.8 mm eye width |  
Weight: 0.6 g | Recommended hook sizes: #6,  
#8.

#### Available Eye Colors by Size:

Green Eye--EBD-M-03

##### Size L (EBD-L):

Red Eye--EBD-L-01 | Yellow Eye--EBD-L-02 |  
Green Eye--EBD-L-03

## Head, Beads, Eyes, Cones

### Tungsten Dumbbell Beads

Tungsten Dumbbell Beads provide the density needed for fast-sinking fly patterns. Significantly heavier than brass of the same size, these beads allow you to create deep-diving flies without excessive bulk. Perfect for getting your flies down quickly in deep water or strong currents. Ideal for tying fast-sinking flies such as deep water Clouser Minnows, Crazy Charlies, shrimp flies, and any pattern requiring extra weight to reach deeper fishing zones.

Material: Tungsten Alloy (97% tungsten, 18g/cm<sup>3</sup>)

Available Finishes: Raw | Silvery | White Nickel | Black Nickel | Golden | Other colors available

Packing: 1000pcs per bag

## Head, Beads, Eyes, Cones

### J Tungsten Beads

J Tungsten Beads feature an innovative offset jig design that transforms any standard hook into an inverted jig hook. The offset weight causes the hook to ride point-up during the drift, reducing snags while maintaining optimal hooking position. Made from high-density tungsten for fast sinking performance.

Ideal for nymph, wet fly, and streamer patterns requiring jig-style action. Perfect for Euro nymphing, deep water drifts, and any situation where snag-free bottom presentation is desired.

#### Available Sizes & Recommended Hook Sizes:

Size 2.3 mm | Recommended hook size #16-#18 |

### 3D Transitional Beads

3D Transition Beads are specially designed for articulated fly patterns. These 6 mm plastic beads create smooth, professional-looking transitions between body sections, allowing for natural movement and articulation. The lightweight construction ensures your flies maintain proper action while the vibrant colors add visual appeal.

Ideal for articulated streamers, baitfish patterns, and any fly requiring smooth transitions between multiple body sections. Perfect for creating lifelike swimming action in larger patterns.

Material: Plastic

Size: 6 mm

Packing: 50pcs/pak

### Glass Bubble Beads

Glass Bubble Beads feature a teardrop shape similar to jig-style beads, creating a weight-forward design that causes hooks to ride point-up for snag-free bottom presentation. The glass material provides natural light reflection underwater, perfectly mimicking the bubbles that form around emerging pupae during insect hatches. During these critical hatching periods, fish respond aggressively to this realistic trigger. The slow sinking rate makes these beads ideal for gentle currents or still, shallow water fishing, with strikes often occurring during the slow descent.

Material: Glass

Size: 2.8 mm, suit for size 12, 16, 18 hooks  
 50pcs/pak

#### Available Colors & SKUs:

Clear -- GBB-01  
 Black -- GBB-02  
 Yellow -- GBB-03  
 Green -- GBB-04  
 Red -- GBB-05  
 Blue -- GBB-06

## Head, Beads, Eyes, Cones

### Glass Midge Beads

Glass Midge Beads are specially designed for tiny fly patterns in hook sizes #16–#24. Available in 1.5 mm and 2 mm sizes, these glass beads add just a hint of flash and weight to midge, mayfly, and other small nymph patterns. Choose from two distinct series—Metallic and Iridescent—with 24 beautiful color options to match any natural insect or attractor pattern. Each mini box contains 100 beads for ample supply.

Available Sizes: 1.5 mm | 2 mm  
 Package: 100 pieces per mini box

## Head, Beads, Eyes, Cones

### Brass Cone Heads

Brass Cone Heads are precision-crafted from quality brass to create professional-looking streamers and baitfish patterns. The cone shape provides a realistic head profile while adding the perfect amount of weight for casting and sinking. The golden finish adds natural flash that attracts fish without being overpowering.

Ideal for streamers, Muddler Minnows, baitfish imitations, and any pattern requiring a weighted, realistic head profile. Perfect for both freshwater and saltwater patterns.

#### Available Sizes & Recommended Hook Sizes:

Size S: 4 mm × 3 mm | Recommended hook sizes: #10-#8 | SKU: BCH-S

Size M: 4.5 mm × 3.5 mm | Recommended hook sizes: #8-#6 | SKU: BCH-M

Size L: 5 mm × 4 mm | Recommended hook sizes: #6-#4 | SKU: BCH-L

Size XL: 6 mm × 5 mm | Recommended hook sizes: #4-#2 | SKU: BCH-XL

Size XXL: 7 mm × 6 mm | Recommended hook sizes: #2-#1/0 | SKU: BCH-XXL

### Colored Brass Cone Heads

Colored Brass Cone Heads are precision-crafted from quality brass with vibrant colored finishes to create professional-looking streamers and baitfish patterns. Available in fluorescent colors for high visibility and classic metallic finishes for natural flash.

Ideal for streamers, Muddler Minnows, baitfish imitations, and any pattern requiring a weighted, realistic head profile. Fluorescent colors are perfect for murky water or low-light conditions.

#### Available Sizes & Recommended Hook Sizes:

Size S: 4 mm | Recommended hook sizes: #10-#8 | Size SKU: CBCH-S

Size M: 4.8 mm | Recommended hook sizes: #8-#6 | Size SKU: CBCH-M

Size L: 5.5 mm | Recommended hook sizes: #6-#4 | Size SKU: CBCH-L

Size XL: 6.3 mm | Recommended hook sizes: #4-#2 | Size SKU: CBCH-XL

Size XXL: 9.5 mm | Recommended hook sizes: #2-#1/0 | Size SKU: CBCH-XXL

Size XXXL: 11 mm | Recommended hook sizes: #1/0-#3/0 | Size SKU: CBCH-XXXL

Available Colors & Color Codes:

FL Green (FG) | FL Yellow (FY)

FL Orange (FO) | FL Pink (FP)

Gold (GD) | Silver (SV)

Copper (CP)

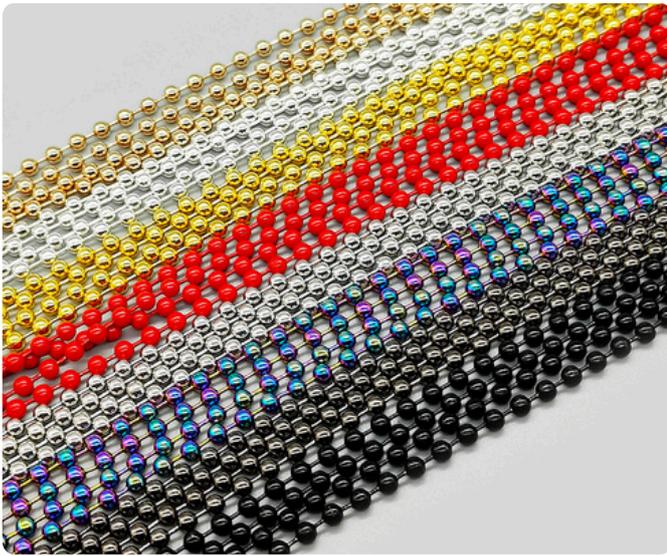

SKU Format: CBCH-[Size]-[Color Code]

Example SKUs:

CBCH-S-FG (Size S, FL Green)

CBCH-M-FO (Size M, FL Orange)

## Head, Beads, Eyes, Cones

### Bead Chain Eyes

Bead Chain Eyes are essential fly tying materials used to add weight and realism to streamers and saltwater patterns. Made from steel alloy, they are lighter than traditional lead dumbbells, allowing for quieter entry on the water while still sinking effectively. The bead chain design helps flies ride hook-up, reducing snags. Perfect for carp, bonefish, and other species requiring subtle presentations.

Material: Steel Alloy

Available Sizes: 1.2 mm | 1.5 mm | 1.8 mm | 2.5 mm | 3.2 mm

Packing: 1 meter per pack

#### Approximate Pairs per Pack:

1.2 mm: approx. 300 pairs  
 1.5 mm: approx. 240 pairs  
 1.8 mm: approx. 170 pairs  
 2.5 mm: approx. 140 pairs  
 3.2 mm: approx. 100 pairs

### JAVI Tungsten Body

JAVI Tungsten Bodies (also known as jig backs) are specialized, ultra-dense fly-tying weights designed specifically for Euro nymphing techniques. Made from 97% tungsten, they are significantly heavier than standard tungsten beads of the same size, allowing you to tie extremely heavy flies without excessive bulk. The tapered profile creates a realistic nymph body shape that can be easily covered with dubbing or UV resin to mimic natural larvae or perdigones. Perfect for getting flies deep fast in strong currents.

Ideal for Euro nymphing, jig hook patterns, heavy nymphs, caddis larvae, perdigon patterns, and any situation requiring maximum weight in minimal size. The jig-style design ensures point-up hook positioning for snag-free bottom drifting.

#### Features:

- 97% tungsten construction - up to 2-3x heavier than standard beads of same size
- 1.7x denser than lead for rapid sinking in heavy, deep water
- Tapered profile allows easy dubbing or UV resin coating
- Ideal for jig hooks - helps flies ride point-up, reducing snags
- Secures easily with super glue or tying thread
- Four sizes and five finishes available

#### Available Sizes, Weight & Recommended Hook Sizes:

- Size XS: 0.25 g | Recommended hook sizes: #16-#18 | Size SKU: JTB-XS
- Size S: 0.35 g | Recommended hook sizes: #14-#16 | Size SKU: JTB-S
- Size M: 0.5 g | Recommended hook sizes: #12-#14 | Size SKU: JTB-M
- Size L: 1.0 g | Recommended hook sizes: #8-#10 | Size SKU: JTB-L

#### Available Colors & Color Codes:

- Raw (RW) | Black Nickel (BN)
- Silver (SV) | Gold (GD)
- Copper (CP)

SKU Format: JTB-[Size]-[Color Code]

#### Example SKUs:

- JTB-XS-RW (Size XS, Raw finish)
- JTB-S-BN (Size S, Black Nickel)
- JTB-M-GD (Size M, Gold)
- JTB-L-CP (Size L, Copper)

### JAVI Tungsten Body

Tungsten Scud Bodies are pre-formed, heavy-density fly tying components designed specifically for curved shank hooks used in Czech Nymphs, scud patterns, and other nymph imitations. The molded, ribbed exterior provides a natural segmented appearance while adding significant weight without the bulk of traditional lead wraps. This allows flies to sink rapidly into deep feeding zones while maintaining a realistic profile. Can be dubbed over for a full look, or used as a "shell back" by securing over materials tied on the hook shank first.

Ideal for Czech Nymphs, scud patterns, sowbug imitations, and any nymph pattern requiring significant weight and realistic segmentation on curved shank hooks. Perfect for Euro nymphing and deep water presentations.

#### Specifications:

**Material:** High-density Tungsten  
**Design:** Pre-formed with molded, ribbed exterior for natural segmented appearance  
**Application:** Designed for curved shank hooks (Czech Nymphs, scud patterns, etc.)  
**Features:** Adds significant weight without bulk, creates realistic segmented profile, easy to secure with thread wraps

#### Available Sizes, Weight & Recommended Hook Sizes:

Size XS: 0.25 g | Recommended hook sizes: #12-#14 | Size SKU: TSB-XS  
 Size S: 0.35 g | Recommended hook sizes: #10-#12 | Size SKU: TSB-S  
 Size M: 0.5 g | Recommended hook sizes: #8-#10 | Size SKU: TSB-M  
 Size L: 1.0 g | Recommended hook sizes: #6-#8 | Size SKU: TSB-L

#### Available Colors & Color Codes:

### 3D Fish Eyes

3D Fish Eyes are premium holographic lure eyes designed for customizing artificial baits and fly tying. Featuring lifelike molded 3D construction with holographic material for high reflection, these eyes add incredible realism to any pattern. Choose from six distinct series—Classical, Oval Pupil, Realistic, Reptile, Luminous, and Lighting—with multiple color options in each series. Available in ten sizes from 3 mm to 12 mm to fit any pattern from small nymphs to large saltwater streamers. The self-adhesive backing makes application quick and easy to any clean, smooth surface.

Perfect for hard baits, jigs, streamers, and flies in both freshwater and saltwater environments. Ideal for adding lifelike eyes to any pattern where realistic attraction is desired.

Packing: 100pcs/pak

#### Available Sizes & Size SKUs:

Size 3 mm: 3DFE-03 | Size 4 mm: 3DFE-04 | Size 5 mm: 3DFE-05

Size 6 mm: 3DFE-06 | Size 7 mm: 3DFE-07 | Size 8 mm: 3DFE-08

Size 9 mm: 3DFE-09 | Size 10 mm: 3DFE-10 | Size 11 mm: 3DFE-11

Size 12 mm: 3DFE-12

#### Series & Color Codes:

## Head, Beads, Eyes, Cones

### 2D Fish Eyes

2D Fish Eyes are flat, holographic stick-on accessories designed to give lures and flies a lifelike appearance without adding the bulk of domed 3D eyes. Each eye features a black pupil on a vibrant holographic background for maximum attraction. The self-adhesive backing allows for quick and easy application to any clean, smooth surface. Available in ten sizes from 3 mm to 12 mm and six holographic colors to match any pattern. For best durability, apply a light coat of clear-drying epoxy over the eye after application.

Perfect for flies, jigs, hard baits, and any lure where realistic eyes are desired without added bulk.

Suitable for both freshwater and saltwater applications.

#### Specifications:

Material: Holographic sticker with self-adhesive backing

Design: Flat, 2D construction with black pupil on holographic background

Application: For lures and flies where bulk reduction is desired

Available Sizes: 3 mm | 4 mm | 5 mm | 6 mm | 7 mm | 8 mm | 9 mm | 10 mm | 11 mm | 12 mm

#### Available Sizes & Size SKUs:

## Furs & Feathers

### Strung Marabou Blood Quill

Short Strung Marabou Blood Quills feature a thinner stem and fuller appearance than standard marabou feathers, making them the superior choice for palmering and short, bushy fly patterns. Individual feathers range from 2–4 inches with barbs from 0.5–2.5 inches, offering versatility for various applications. Available in 36 stunning colors including a full fluorescent series.

#### Application:

- Tailing streamers
- Realistic swimming nymph patterns (damselflies, etc.)
- Wings on streamers
- Gills and thoraxes on nymphs
- Palmering and short, bushy flies

#### Packing: 1/4 oz

- Length: Individual feathers vary from 2–4 inches with barbs from 1/2 inch to 2.5 inches
- Material: Marabou Blood Quill (thinner stem, fuller appearance than standard marabou feathers)
- Application: Tailing streamers, realistic swimming nymphs (damselflies), wings on streamers, gills and thoraxes on nymphs

#### Available Colors & SKUs:

- White -- SMBQ-01 | Burnt Orange -- SMBQ-02
- Ginger -- SMBQ-03 | Tan -- SMBQ-04

- FL. Chartreuse -- SMBQ-35 | FL. Pink -- SMBQ-36

## Furs & Feathers

### Strung Marabou Feather

Strung Marabou Feathers feature extra-long individual feathers measuring 6–7 inches with barbs reaching nearly 3 inches, making them ideal for patterns requiring maximum length and flowing action. The soft, natural material creates lifelike movement in water that fish find irresistible. Available in 36 stunning colors including a complete fluorescent series.

#### Application:

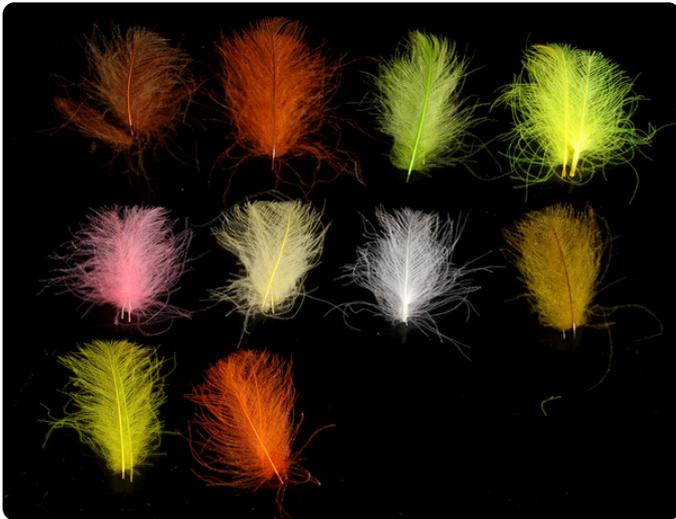

- Tailing streamers
- Realistic swimming nymph patterns (damselflies, etc.)
- Wings on streamers
- Gills and thoraxes on nymphs
- Patterns requiring extra fiber length

#### Available Colors & SKUs:

- White -- SMF-01 | Burnt Orange -- SMF-02
- Ginger -- SMF-03 | Tan -- SMF-04
- Orange -- SMF-05 | Yellow -- SMF-06
- Cream -- SMF-07 | Brown -- SMF-08
- Golden Brown -- SMF-09 | Rusty Brown -- SMF-10
- Wine -- SMF-11 | Red -- SMF-12
- Light Olive -- SMF-13 | Yellow Olive -- SMF-14

## Furs & Feathers

### CDC Feather

CDC stands for Cul de Canard, which is French for "duck's bottom". These feathers are found around the preen gland of ducks and geese.

**Superior Buoyancy:** The feathers are naturally coated in oils from the preen gland. More importantly, the unique structure of the fibers features hundreds of tiny hook-like barbules that trap air bubbles, helping the fly float high in the water film.

**Lifelike Movement:** The fibers are extremely soft and mobile, fluttering in even the slightest breeze or current to mimic the movement of real insect wings or legs.

**Versatility:** While famous for dry flies and emergers, CDC is also used for soft hackle collars on nymphs to trap air and simulate emerging insects.

#### Available Colors & SKUs:

Natural Grey -- CDC-01  
 Black -- CDC-02  
 Dark Orange -- CDC-03  
 Pale Yellow -- CDC-04  
 Green -- CDC-05  
 Dark Olive -- CDC-06  
 Orange -- CDC-07  
 Light Olive -- CDC-08  
 Pink -- CDC-09  
 Brown -- CDC-10  
 FL. Yellow -- CDC-11  
 Olive -- CDC-12  
 FL. Green -- CDC-13  
 Cream -- CDC-14

### Goose Biots

Goose Biots are essential fly tying materials harvested from the leading edge of goose primary feathers.

These stiff, tapered fibers are naturally durable and create incredibly realistic segmented bodies, wing cases, tails, and antennae on nymph and dry fly patterns. Shorter and narrower than turkey biots, they are ideally suited for smaller flies where precision matters. Available in 20 carefully selected colors to match natural insect variations.

#### Application:

Prince Nymph: Wings  
 Copper John: Tails  
 Stonefly Nymphs: Tails and antennae  
 Buzzers/Midges: Wrapped bodies  
 Any pattern requiring stiff, tapered, segmented appendages

#### Available Colors & SKUs:

Sulphur Orange -- GB-01  
 Natural Gray -- GB-02  
 White -- GB-03  
 Yellow -- GB-04  
 Olive -- GB-05  
 Black -- GB-06  
 Dyed Dun -- GB-07  
 Dark Brown -- GB-08  
 Ginger -- GB-09  
 Rusty Brown -- GB-10  
 Light Olive -- GB-11  
 Tan -- GB-12  
 Caddis Green -- GB-13  
 Light Cahill -- GB-14  
 Blue Wing Olive -- GB-15  
 Callibaetis -- GB-16  
 Sulphur Yellow -- GB-17  
 Red -- GB-18  
 Purple -- GB-19  
 Amber -- GB-20

## Furs & Feathers

### Turkey Biots

Turkey Biots are premium fly-tying materials harvested from the leading edge of turkey primary feathers. Compared to goose biots, they offer extra length and increased flexibility, making them the preferred choice for wrapping realistic, segmented bodies on larger fly patterns. The natural taper creates lifelike segmentation that mimics the appearance of natural insect abdomens and appendages. Available in 21 carefully selected colors including fluorescent green for added attraction.

#### Application:

Wrapped bodies on larger nymphs and wet flies  
Wing cases on stonefly and dragonfly patterns  
Tails and antennae on larger patterns  
Perfect for patterns requiring extended length or flexibility

#### Available Colors & SKUs:

White -- TB-01  
Blue Dun -- TB-02  
Tan -- TB-03  
Caddis Green -- TB-04  
Olive -- TB-05  
Light Cahill -- TB-06  
Amber -- TB-07  
Sulphur Orange -- TB-08  
Adams Gray -- TB-09  
Pale Morning Dun -- TB-10  
Blue Wing Olive -- TB-11  
Callibaetis -- TB-12  
Green Drake -- TB-13  
Sulphur Yellow -- TB-14  
Hendrickson Pink -- TB-15  
Purple -- TB-16  
Black -- TB-17  
Red -- TB-18  
Blue -- TB-19  
Light Blue -- TB-20  
FL Green -- TB-21

### Strung Rooster Saddle Hackle

Strung Rooster Saddle Hackle is the go-to material for larger flies requiring length, motion, and durability. With long, flowing fibers in the 5-7 inch range, this hackle is specifically designed for streamers and warmwater patterns where profile and movement matter more than subtlety. The long saddle fibers pulse and breathe in the water, giving flies a lifelike presence with minimal material. The strung presentation makes it easy to select exact feather lengths and tie them in cleanly, whether you're palmering bodies or building full, flowing profiles on larger patterns.

#### Application:

Streamer bodies and collars  
Warmwater patterns (bass, pike, muskie)  
Palmered hackle on larger flies  
Full, flowing profiles on streamers  
Saltwater patterns requiring long, durable fibers

#### Available Colors & SKUs:

Black -- SRSH-01  
White -- SRSH-02  
Green -- SRSH-03  
Red -- SRSH-04  
White -- SRSH-05  
Yellow -- SRSH-06  
Natural Ginger -- SRSH-07  
Olive -- SRSH-08  
Blue -- SRSH-09  
Pink -- SRSH-10

## Furs & Feathers

### Grizzly Rooster Saddle Hackle

Grizzly Rooster Saddle Hackle features premium-quality feathers with the distinctive barred pattern that makes grizzly hackle so effective for imitating natural insects and baitfish. With long, flowing fibers measuring 5–7 inches, these saddles are ideal for trout, salmon, and steelhead intruder patterns, as well as large predator streamers for pike, musky, and saltwater tarpon. Available in natural and beautifully dyed colors, these versatile feathers are also perfect for tying long feather hair extensions.

#### Application:

- Trout, salmon, and steelhead intruder patterns
- Large predator streamers (pike, musky, tarpon)
- Collars and wings on streamers
- Feather hair extensions
- Any pattern requiring long, flowing grizzly hackle

#### Available Colors & SKUs:

- Rose -- GRSH-01
- Blue -- GRSH-02
- Yellow -- GRSH-03
- Natural -- GRSH-04
- Olive -- GRSH-05
- Natural Barred -- GRSH-06

### Strung Peacock Herl

Strung Peacock Herl features the natural iridescent green-blue feathers that have been a staple in fly tying for generations. The strung presentation makes it easy to select individual herls or work with multiple strands at once. The natural shimmer and movement of peacock herl creates lifelike insect imitations that fish find irresistible.

#### Application:

- Nymph bodies (Pheasant Tail, Copper John, etc.)
- Streamer throats and gills
- Tails and wing cases
- Wet fly bodies
- Any pattern requiring natural iridescence and movement

Packing: 5g/pak

#### Available Color & SKU:

Natural Iridescent -- SPH-01

## Furs & Feathers

### Ostrich Plumes

Ostrich Plumes are premium fly-tying materials prized for their extra-long, fluffy herl that creates incredible lifelike movement in water. With plumes measuring 25–30 cm and individual fibers reaching 5–10 cm, each plume provides ample material for multiple flies. These feathers are soft yet durable, allowing for seamless application across a wide range of patterns. Perfect for gilled nymphs, streamer tails, salmon fly butts, bodies, and intricate designs. Available in 14 vibrant dyed colors to suit any pattern requirement.

#### Application:

Gilled nymphs and wet flies  
Streamer tails and throats  
Salmon fly butts and bodies  
Soft hackle collars

Any pattern requiring lifelike movement and texture

#### Available Colors & SKUs:

Red -- OP-01  
White -- OP-02  
Black -- OP-03  
Yellow -- OP-04  
Pink -- OP-05  
Sky Blue -- OP-06  
Light Blue -- OP-07  
Purple -- OP-08  
Green -- OP-09  
Burgundy -- OP-10  
Tan -- OP-11  
Brown -- OP-12  
Orange -- OP-13  
Gray -- OP-14

### Mallard Flank

Mallard Flank feathers are a cornerstone material in fly tying, prized for their distinct natural barring, soft texture, and versatility across all patterns. Known for their intricate speckles and faint stripes, these feathers create subtle contrast and life-like realism that synthetic materials often fail to replicate. Soft, mobile, and naturally tapered, they pulse with life underwater, with transparency and mottling that mimics everything from minnow backs to insect wings. Available in natural grey, wood duck gold, olive, and orange to suit a variety of patterns.

#### Application:

Wings:

Upright wings on dry flies (like Light Cahill)  
Slips for classic wet fly and salmon fly wings

Collars & Soft Hackles:

Collars on streamers and steelhead flies  
Traditional wet fly hackles

Tails & Legs:

Individual fibers for mottled, realistic tails and legs  
Nymph and emerger appendages

Cheeks & Fins:

Cheeks on streamers  
Pectoral fins for sculpin patterns

#### Available Colors & SKUs:

Natural Grey -- MF-01  
Wood Duck Gold -- MF-02  
Olive -- MF-03  
Orange -- MF-04

## Furs & Feathers

### Rabbit Strips / Zonker Strips

Hare Strips / Zonker Strips are premium rabbit strips specially prepared for fly tying. Each strip is soft, full, and evenly dyed to create attractive movement in the water that fish find irresistible. Available in three widths—1/8" (3.5 mm), 1/6" (5 mm), and 1/4" (6 mm)—to accommodate patterns of various sizes. Choose from 44 beautiful colors including solids, barred patterns, and fluorescent options.

#### Available Colors & SKUs:

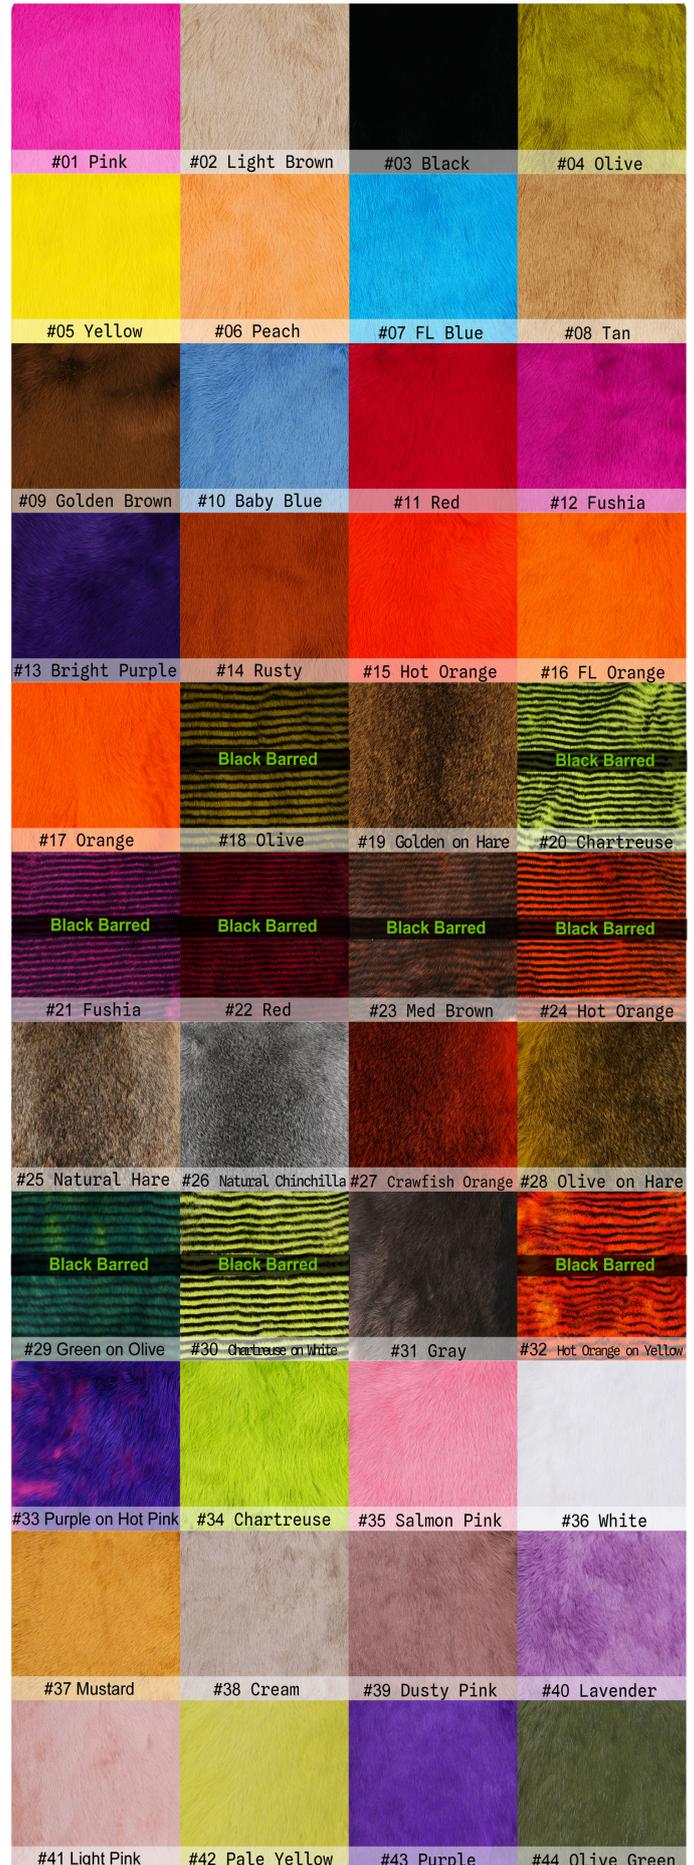

- Pink -- HZS-01 | Light Brown -- HZS-02
  - Black -- HZS-03 | Olive -- HZS-04
  - Yellow -- HZS-05 | Peach -- HZS-06
  - FL Blue -- HZS-07 | Tan -- HZS-08
  - Golden Brown -- HZS-09 | Baby Blue -- HZS-10
  - Red -- HZS-11 | Fushia -- HZS-12
  - Bright Purple -- HZS-13 | Rusty -- HZS-14
  - Hot Orange -- HZS-15 | FL Orange -- HZS-16
  - Orange -- HZS-17 | Black Barred Olive -- HZS-18
  - Golden on Hare -- HZS-19 | Black Barred Chartreuse -- HZS-20
  - Black Barred Fushia -- HZS-21 | Black Barred Red -- HZS-22
  - Black Barred Med Brown -- HZS-23 | Black Barred Hot Orange -- HZS-24
  - Black Barred Green on Olive -- HZS-29 | Black Barred Chartreuse on White -- HZS-30
  - Gray -- HZS-31 | Black Barred Hot Orange on Yellow -- HZS-32
  - Purple on Hot Pink -- HZS-33 | Chartreuse -- HZS-34
  - Salmon Pink -- HZS-35 | White -- HZS-36
  - Mustard -- HZS-37 | Cream -- HZS-38
  - Dusty Pink -- HZS-39 | Lavender -- HZS-40
  - Light Pink -- HZS-41 | Pale Yellow -- HZS-42
  - Purple -- HZS-43 | Olive Green -- HZS-44
- SKU Format: HZS-[Width Code]-[Color Number]

#### Width Codes:

- 1/8" (3.5 mm): 125
- 1/6" (5 mm): 166
- 1/4" (6 mm): 250

#### Example SKUs:

- HZS-125-03 (1/8" Width, Black)
- HZS-166-16 (1/6" Width, FL Orange)
- HZS-250-36 (1/4" Width, White)
- HZS-125-21 (1/8" Width, Black Barred Fushia)

## Furs & Feathers

### Calf Tail / Skip Tail

Calf Tail (also known as kiptail) is a staple natural material in fly tying, prized for its crinkly texture, fine fibers, and excellent buoyancy. Unlike bucktail, which is longer and straighter, calf tail is shorter (typically 1" to 2.5") and has a natural "kink" that adds volume and helps flies shed water. Available in 10 versatile colors including white, green, orange, blue, grey, yellow, pink, tan, black, and olive.

#### Application:

Parachute Posts:

Stiffness and high visibility make it the go-to material for parachute posts on dry flies like the Parachute Adams

Wings:

Essential for divided-wing dry flies (Royal Wulff, etc.)  
Texture helps wings stand upright

Bonefish & Saltwater Flies:

Widely used for wings and tails on patterns like Crazy Charlie

Maintains profile in water

Streamer Accents:

Provides stability as an underwing for delicate materials like marabou or mallard flank

#### Available Colors & SKUs:

White -- CT-01  
Green -- CT-02  
Orange -- CT-03  
Blue -- CT-04  
Grey -- CT-05  
Yellow -- CT-06  
Pink -- CT-07  
Tan -- CT-08  
Black -- CT-09  
Olive -- CT-10

### Arctic Fox Polar Tail Fur

Arctic Fox Polar Tail Fur is a premium natural fly tying material renowned for its exceptional movement and pulsating action in the water. Significantly softer and more supple than calf tail, it serves as a popular, durable alternative to marabou for tails, wings, and collars. The long, fine fibers naturally taper and compress easily when tied, allowing for slim profiles and neat, small heads on flies. With fiber lengths typically ranging from 2 to 3.5 inches (select pieces up to 4 inches), it provides ample material for various patterns. The "lively" undulation underwater is often compared to marabou but with much higher durability. Available in 12 stunning colors including fluorescent options.

#### Application:

Saltwater Patterns: Bonefish wings, tarpon collars

Salmon & Steelhead: Intruder flies, hairwing patterns

Streamers: Tails, wings, and collars

Wet Flies: Soft hackle collars and throats

Baitfish Imitations: Slim, tapered profiles

#### Available Colors & SKUs:

White -- AFT-01  
Black -- AFT-02  
FL Pink -- AFT-03  
FL Orange -- AFT-04  
Red -- AFT-05  
Blue -- AFT-06  
Burgundy -- AFT-07  
Purple -- AFT-08  
Green -- AFT-09  
Olive -- AFT-10  
Mustard -- AFT-11  
Yellow -- AFT-12

## Furs & Feathers

### Hare's Mask

A hare's mask is a fundamental fly-tying material prized for providing multiple hair textures in a single source. Each part of the mask offers different qualities, making it a highly versatile "all-in-one" fur source. It is most famous as the essential ingredient for the Gold Ribbed Hare's Ear nymph, one of the most effective and enduring fly patterns ever created.  
(harvested from farm raised rabbit)

#### Features:

Multiple textures in one mask—guard hairs, underfur, and ear hairs

Versatile "all-in-one" material for various applications

Creates authentic "buggy" appearance

Natural variation in hair length and stiffness

Essential for classic and modern nymph patterns

#### Between the Ears:

Stiffest guard hairs

Ideal for spiky tails

Creates very rough, buggy dubbing

#### Cheek Areas:

Softer, fluffier underfur

Easier to dub

Creates smoother bodies

#### Ears:

Particularly valuable spiky quality

Namesake for the Hare's Ear nymph

Perfect for body dubbing

#### Available Colors & SKUs:

Natural -- HM-01

Black -- HM-02

Olive -- HM-03

Brown -- HM-04

Tan -- HM-05

Orange -- HM-06

Green -- HM-07

### Deer Hair Patches

Deer Hair Patches are essential natural materials for fly tying, valued for their hollow structure which provides exceptional buoyancy. Each 6×6 cm patch offers premium-quality deer hair suitable for various applications. The effectiveness depends on which part of the animal the hair was harvested from—belly, body, coastal, or hock—each with unique properties for specific fly patterns. Available in natural and seven dyed colors.

#### Features:

Hollow structure provides natural buoyancy  
Multiple hair types from different body sections  
Versatile for spinning, stacking, and winging  
Creates floating dry fly wings, spun bodies, and "buggy" heads

8 color options including natural and dyed

#### Application:

Spun bodies for bass bugs and poppers

Muddler Minnow heads

Bushy dry fly bodies (Goddard Caddis)

Delicate dry fly wings

Durable legs and antennae

Floating wings for Hair-Wing Dun patterns

#### Specifications:

Size: 6 × 6 cm per patch

Material: Natural deer hair with hollow structure for exceptional buoyancy

Features: Hollow fibers provide natural floatation, versatile texture options based on harvest location

#### Available Colors & SKUs:

Natural -- DHP-01

Green -- DHP-02

Brown -- DHP-03

Olive -- DHP-04

Pink -- DHP-05

Red -- DHP-06

Black -- DHP-07

Orange -- DHP-08

## Threads & Wires

### Nylon Flat Tying Thread

Nylon Flat Tying Thread is a versatile, beginner-friendly thread with a flat profile that lays smooth on wraps. The moderate stretch (~25%) helps secure materials effectively while being forgiving for those new to fly tying. Available in sizes from 50D (fine) to 200D (heavy) to accommodate patterns from tiny nymphs to large streamers. Choose from 28 colors including essential natural shades and bright fluorescent options for high-visibility applications.

100m/spool

#### Available Sizes & Size SKUs:

**Size 50D:** SKU: NFT-50

**Size 75D:** SKU: NFT-75

**Size 100D:** SKU: NFT-100

**Size 120D:** SKU: NFT-120

**Size 200D:** SKU: NFT-200

#### Available Colors & Color Codes:

- White (#1) -- C01
- Yellow (#2) -- C02
- Red (#3) -- C03
- Gray (#4) -- C04
- Rusty Dun (#5) -- C05
- Tan (#6) -- C06
- Rusty Brown (#7) -- C07
- Wine (#8) -- C08
- Light Olive (#9) -- C09
- Green (#10) -- C10
- DK. Brown (#11) -- C11
- Olive (#12) -- C12
- Cream (#13) -- C13

 FL. Sunburst (#27) -- C27  
 FL. Fire Orange (#28) -- C28  
 SKU Format: NFT-[Size]-[Color Code]

#### Example SKUs:

NFT-50-C01 (50D, White)  
 NFT-100-C14 (100D, Black)  
 NFT-120-C23 (120D, FL. Orange)  
 NFT-200-C26 (200D, FL. Green)

## Threads & Wires

### GSP Fly Tying Thread

Gel Spun Polyethylene (GSP) is an ultra-strong, low-stretch fly-tying thread that allows tiers to apply significant pressure without breaking. It is the go-to material for spinning deer hair, tying large streamers, and constructing tiny, low-bulk trout flies. Available in deniers from 10D for micro patterns to 200D for heavy-duty deer hair spinning, with multiple color options per size.

100m/spool

#### Features:

- Ultra-strong with minimal stretch
- Allows significant pressure without breaking
- Low bulk for tidy heads
- Available in 8 deniers from 10D to 200D
- Multiple color options per size
- Takes permanent markers for custom coloring

#### Specifications:

Material: Gel Spun Polyethylene (GSP)

Features: Ultra-strong, low-stretch, high abrasion resistance

Breaking Strength: Varies by denier

Critical Handling: Naturally slippery—use base layer and super glue; use ceramic bobbins; may require serrated scissors; takes permanent markers well for color customization

#### Critical Handling Tips:

**Slickness:** Apply base layer and super glue to prevent material rotation

**Cutting:** Use serrated or tungsten scissors; slice rather than snip

**Coloring:** Takes permanent markers (Sharpies) exceptionally well

**Bobbin Choice:** Use ceramic-lined bobbins to prevent grooving and fraying

#### Available Sizes, Colors & Recommended Applications:

##### 10 Denier

Colors: White

Breaking Strength: Approx. 1–2 lb

Application: Ideal for the smallest fly tying applications, including micro patterns and tiny midges where minimal bulk is essential.

SKU: GSP-10

##### 20 Denier

Colors: White, Black, Red, Green

Breaking Strength: Approx. 2–3 lb

Application: Perfect for small dry flies and midges requiring fine thread with reliable strength.

SKU: GSP-20

##### 30 Denier

Colors: White, Black, Light Brown, Red, Brown, Grey, Army Green

Breaking Strength: Approx. 2–4 lb

Application: Excellent for small dry flies and midge patterns where low bulk and adequate strength are needed.

SKU: GSP-30

##### 50 Denier

Colors: White, Black, Light Brown, Red, Green, Pink, Army Green, Blue

Breaking Strength: Approx. 4–6 lb

Application: A versatile all-purpose freshwater thread suitable for dry flies, nymphs, and general tying applications.

SKU: GSP-50

##### 75 Denier

Colors: White, Black, Red, Brown, Grey, Army Green, Pink

Breaking Strength: Approx. 6–8 lb

Application: Ideal for all-purpose freshwater and saltwater flies, providing excellent strength for a wide range of patterns.

SKU: GSP-75

## Threads & Wires

### GSP Fly Tying Thread

#### 100 Denier

Colors: White, Black, Red, Brown, Blue, Army Green, Pink

Breaking Strength: Approx. 8–10 lb

Application: Perfect for bonefish, permit, and general saltwater patterns where increased strength is required without excessive bulk.

SKU: GSP-100

#### 140 Denier

Colors: White, Black, Red, Blue, Green, Pink

Breaking Strength: Approx. 12–14 lb

Application: Designed for large streamers and predator flies requiring substantial strength for securing heavy materials.

SKU: GSP-140

#### 200 Denier

Colors: White, Black, Red, Blue, Green, Pink, Light Brown

Breaking Strength: Approx. 14–16 lb

Application: The go-to choice for large predator flies, bass poppers, and heavy-duty deer hair spinning where maximum strength is essential.

SKU: GSP-200

**SKU Format: GSP-[Denier]-[Color Code]**

#### Color Codes:

White (WH) | Black (BK) | Red (RD)  
 Green (GN) | Light Brown (LB) | Brown (BR)  
 Grey (GY) | Army Green (AG) | Pink (PK)  
 Blue (BL)

#### Example SKUs:

GSP-50-WH (50 Denier, White)  
 GSP-100-BK (100 Denier, Black)  
 GSP-150-BL (150 Denier, Blue)  
 GSP-200-AG (200 Denier, Army Green)

### Application by Denier:

**10–20 Denier:** For the smallest fly tying applications, including micro patterns and tiny midges where minimal bulk is essential.

**30–50 Denier:** Ideal for small dry flies and midges, with 30D suitable for fine work and 50D offering versatile all-purpose freshwater use for dry flies and nymphs.

**75–100 Denier:** Perfect for all-purpose freshwater and saltwater flies, including bonefish and permit patterns where increased strength is required without excessive bulk.

**150–200 Denier:** Designed for large predator flies, bass poppers, and heavy-duty deer hair spinning where maximum strength is essential.

## Threads & Wires

### 300D Fly Tying Floss

300D Fly Tying Floss is a multifilament material specifically designed to create smooth, glossy bodies and vibrant "tags" on a variety of fly patterns. Unlike standard thread, this floss can be flattened out to cover the hook shank quickly without adding excessive bulk, resulting in clean, professional-looking flies. Ideal for traditional salmon patterns, trout nymphs, and any fly requiring smooth, colorful bodies. Each spool contains 100 m of high-quality floss in your choice of 12 vibrant colors.

#### Features:

- Multifilament construction for smooth, glossy bodies
- Flattens easily to cover hook shanks quickly
- Minimal bulk addition
- 300D strength for durability
- 100 m length per spool for extended use
- 12 vibrant colors available

#### Application:

- Smooth, glossy bodies on traditional salmon patterns
- Vibrant tags on wet flies and streamers
- Trout nymph bodies
- Any pattern requiring quick, low-bulk coverage with brilliant color
- Wrapping and ribbing accents

#### Available Colors & SKUs:

- Brown -- FTF-01
- Pink -- FTF-02
- Dark Brown -- FTF-03
- Red -- FTF-04
- Lake Blue -- FTF-05
- Blue -- FTF-06
- Fruit Green -- FTF-07
- Green -- FTF-08
- Wine Red -- FTF-09
- Orange -- FTF-10
- White -- FTF-11
- Black -- FTF-12

### 300D Fly Tying Floss

Underbody Fly Tying Thread is a thick, stretchy nylon thread specifically engineered to build and smooth bodies on flies. It is commonly used to cover lead wire on nymphs, creating a smooth foundation for final body materials. Also essential for creating professional underbodies on classic salmon flies and steelhead patterns. Available in white only, in three convenient sizes: 300D x 100 yards for general use, 600D x 30 yards for heavier applications, and 900D x 20 yards for maximum bulk and coverage.

#### Application:

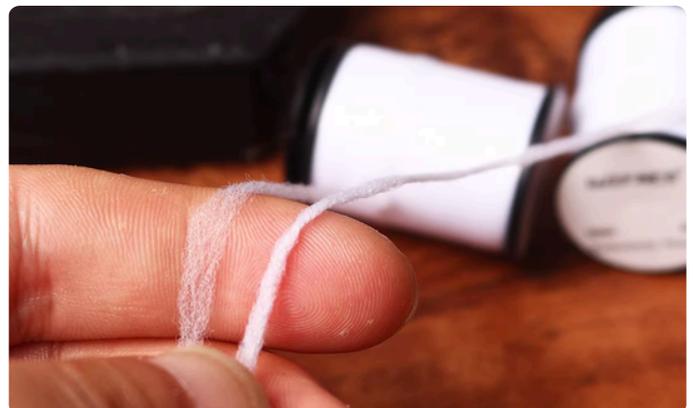

- Covering lead wire on nymphs and weighted patterns
- Creating smooth foundations for salmon fly bodies
- Building underbodies for streamers and wet flies
- Smoothing transitions between materials
- Adding bulk without adding final color

#### Features:

- Thick, stretchy nylon construction
- Perfect for building smooth body foundations
- Covers lead wire and weighting materials effectively
- Creates professional underbodies for salmon and steelhead patterns
- Available in three sizes for different applications

#### Available Options & SKUs:

- 300D x 100 yards:**  
White -- UFT-300-WH
- 600D x 30 yards:**  
White -- UFT-600-WH
- 900D x 20 yards:**  
White -- UFT-900-WH

## Threads & Wires

### 300D Lumo/FL Thread

300D Luminous FL. Tying Thread combines the strength of 300D thread with a special luminous finish that glows in low-light conditions. This thick, fluorescent thread is perfect for building fly bodies, tying large streamers, creating nymph tags, and any pattern designed for night fishing, murky water conditions, or saltwater jig fly tying. The luminous properties ensure your flies remain visible and attractive when natural light is limited. Available in six vibrant colors including White, Lt Green, Green, Orange, Pink, and Blue.

#### Specifications:

Denier: 300D

Length: 100 yards per spool

Material: Thick luminous thread

Features: Luminous finish glows in low-light conditions; thick construction for building bodies; bright fluorescent colors

#### Application:

Building fly bodies on streamers and nymphs

Tying large streamers for predator species

Creating highly visible tags on nymphs

Night fishing patterns

Murky water fishing applications

Saltwater jig fly tying

Any pattern requiring enhanced visibility in low-light conditions

#### Available Colors & SKUs:

White -- LTT-01-WH

Lt Green -- LTT-02-LG

Green -- LTT-03-GN

Orange -- LTT-04-OR

Pink -- LTT-05-PK

Blue -- LTT-06-BL

### 300D Fly Tying Floss

Perdigon Body Tinsel Thread is a specialized fine-diameter material designed specifically for tying Perdigon nymphs. Unlike traditional thread, this tinsel thread is strong enough to be used directly in a bobbin, allowing you to tie the entire fly body quickly and efficiently. The non-absorbent, flashy material creates the slim, smooth, "bullet-like" profile characteristic of effective Perdigon patterns, enabling rapid sinking while adding just the right amount of flash. Available in five pearlized colors: pearl white, pearl purple, pearl pink, pearl yellow, and pearl red. Each spool contains 100 m of high-quality tinsel thread.

#### Features:

Fine diameter for slim, streamlined bodies

Non-absorbent material for rapid sinking

Flashy pearl finish adds attraction

Strong enough for direct bobbin use

Creates smooth "bullet-like" Perdigon profiles

100 m per spool for extended use

Five pearlized color options

#### Available Colors & SKUs:

Pearl White -- PBT-01-PW

Pearl Purple -- PBT-02-PP

Pearl Pink -- PBT-03-PPK

Pearl Yellow -- PBT-04-PY

Pearl Red -- PBT-05-PR

**SKU Format:** PBT-[Color Code]

#### Color Codes:

Pearl White (PW) | Pearl Purple (PP) | Pearl Pink (PPK)

Pearl Yellow (PY) | Pearl Red (PR)

## Threads & Wires

### 150D Luminous Flash Tying Thread

150D Flash Luminous Tying Thread is a versatile mid-weight material that combines the flash of metallic thread with glow-in-the-dark luminous properties. This unique combination makes it ideal for patterns requiring maximum visibility in challenging light conditions. Perfect for creating Perdigon nymph bodies, buzzer patterns, and saltwater assist hooks where deep water or murky conditions demand high-visibility materials. Available in eight vibrant colors including Orange, Purple, Blue, Silver, Pearl White, Chartreuse, Pink, and Yellow.

#### Features:

- Metallic finish for exceptional flash
- Luminous properties glow in low-light conditions
- 150D mid-weight versatility
- 50 m per spool for multiple applications
- High visibility in deep or murky water
- Perfect for modern nymphing techniques

#### Application:

- Perdigon nymph bodies
- Buzzer and midge patterns
- Saltwater assist hooks
- Deep water nymphing
- Murky water fishing conditions
- Night fishing applications
- Any pattern requiring metallic flash and luminous properties

#### Available Colors & SKUs:

- Orange -- MLT-01-OR
- Purple -- MLT-02-PU
- Blue -- MLT-03-BL
- Silver -- MLT-04-SV
- Pearl White -- MLT-05-PW
- Chartreuse -- MLT-06-CH
- Pink -- MLT-07-PK
- Yellow -- MLT-08-YE

**SKU Format:** MLT-[Color Code]

#### Color Codes:

- Orange (OR) | Purple (PU) | Blue (BL) | Silver (SV)
- Pearl White (PW) | Chartreuse (CH) | Pink (PK) | Yellow (YE)

### Fly Tying Copper Wire 0.1mm

Fly Tying Copper Wire in 0.1 mm diameter (approx. 0.004 inches) is an ultra-fine material specifically engineered for the smallest fly patterns. Its primary advantage is providing subtle flash, realistic segmentation, and micro-weighting without adding bulk to delicate trout flies or midges. Perfect for hook sizes #16 through #28, this wire allows precise control for the most detailed work. Available in 12 colors including metallic gold and silver, as well as matte finishes like olive green, coffee, and rose red. Each spool contains 60 m of high-quality copper wire.

**Ribbing for Micro-Flies:** Ideal for adding durability and segmentation to size #16–28 patterns

**Dry Fly Reinforcement:** Counter-rib over delicate materials (peacock herl, stripped quills) to increase fly life without affecting buoyancy

**Specific Patterns:** Essential for Zebra Midge (fine rib), RS2/WD-40, Diawl Bach, and other classic small flies

**Segmented Bodies:** Used alone or twisted with other colors for banded, realistic larvae and nymph bodies

**Micro-Weighting:** Adds subtle weight for sinking control on tiny patterns

60m/spool

#### Available Colors & SKUs:

- Green -- FCW-0.1-GN
- Gold -- FCW-0.1-GD
- Purple -- FCW-0.1-PU
- Olive Green -- FCW-0.1-OG
- Red -- FCW-0.1-RD
- Sky Blue -- FCW-0.1-SB
- Black -- FCW-0.1-BK
- Silver -- FCW-0.1-SV
- Orange -- FCW-0.1-OR
- Coffee -- FCW-0.1-CF
- Brown -- FCW-0.1-BR
- Rose Red -- FCW-0.1-RR

## Threads & Wires

### Fly Mark Yarn

Fly Mark Yarn is a versatile synthetic yarn designed primarily as an attachment to fly lines during Euro nymphing to serve as a visual strike indicator. The bright fluorescent colors ensure maximum visibility in various light and water conditions. Beyond its primary use, this yarn also works excellently as parachute posts on dry flies or as highly visible tags on nymph patterns. Available in black and four fluorescent colors: FL. White, FL. Yellow, FL. Chartreuse, and FL. Pink.

#### Specifications:

Material: Synthetic yarn

Length: 20 m per spool

Colors: Black, FL. White, FL. Yellow, FL. Chartreuse, FL. Pink

#### Application:

**Euro Nymphing:** Attached to fly line as visual strike indicator/mark yarn

**Parachute Posts:** Highly visible posts for dry flies

**Nymph Tags:** Bright tags for visibility and attraction

**Indicators:** Custom strike indicators for any fishing situation

#### Available Colors & SKUs:

Black -- FMY-01-BK

FL. White -- FMY-02-FW

FL. Yellow -- FMY-03-FY

FL. Chartreuse -- FMY-04-FC

FL. Pink -- FMY-05-FP

**SKU Format:** FMY-[Color Code]

#### Color Codes:

Black (BK) | FL. White (FW) | FL. Yellow (FY)

FL. Chartreuse (FC) | FL. Pink (FP)

### Fly Tying Copper Wire 0.2mm

Fly Tying Copper Wire in 0.2 mm diameter (approximately 0.008 inches) is the "Small" or "Standard" gauge wire and the most versatile size in all of fly tying. It is the gold standard for ribbing nymphs and building bodies on medium-sized trout flies, typically ranging from hook sizes #12 to #18. Essential for classic patterns like the Pheasant Tail Nymph and Hare's Ear, this wire protects delicate herls and fibers from abrasive trout teeth while adding realistic segmentation and subtle flash. Available in 10 colors including metallic gold and silver, as well as matte finishes like olive green, coffee, and rose red. Each spool contains 50 m of high-quality copper wire.

#### Specifications:

Diameter: 0.2 mm (approx. 0.008 inches)

Length: 50 m per spool

Material: Copper

Features: Versatile "Small" or "Standard" gauge wire; adds flash, segmentation, and micro-weighting; protects delicate materials

#### Available Colors & SKUs:

Green -- FCW-0.2-GN

Gold -- FCW-0.2-GD

Purple -- FCW-0.2-PU

Olive Green -- FCW-0.2-OG

Red -- FCW-0.2-RD

Black -- FCW-0.2-BK

Silver -- FCW-0.2-SV

Coffee -- FCW-0.2-CF

Brown -- FCW-0.2-BR

Rose Red -- FCW-0.2-RR

**SKU Format:** FCW-0.2-[Color Code]
